Business Description:	<p><b>Advanced Blockchain AG</b> is a publicly traded blockchain venture builder focused on fostering, building, and investing in disruptive technologies, including token investments. Their primary markets are the venture capital sector for companies operating in blockchain technology, with a particular focus on decentralized finance and infrastructure projects that enable Web 3.0. The business model is based on three pillars:</p> <p><b>Smart Capital Investments:</b> Strategic capital allocation and portfolio support. AB. Capital is the investment arm uniquely positioned to provide smart capital to entrepreneurs at every stage of the business lifecycle. Advanced Blockchain's portfolio companies can fully leverage resources provided by AB Labs and AB Research to accelerate their growth, refine their innovations, and scale their operations. This enables the company to offer its shareholders early access to attractive and exclusive Web3 opportunities, thereby providing long-term value to global investors, partners, and communities.</p> <p><b>Proactive Venture Building and Incubation:</b> An integrated approach to venture building and scaling. AB.Labs is a hub for like-minded founders looking to develop their ideas through Advanced Blockchain's venture-building division. The company provides entrepreneurs with the necessary resources to develop and scale their ideas while identifying additional opportunities to integrate their developments with other products and services within Advanced</p>

	<p>Blockchain's holistic ecosystem. The labs and research teams work together to develop valuable and essential solutions equipped with the necessary talent, resources, and tools to scale the business efficiently and successfully.</p> <p><b>Holistic Research and Education:</b> Comprehensive research efforts and educational programs. AB Research is an integral part of developing the future of Web3 by analyzing, theorizing, and implementing solutions for the industry's key issues. The research department acts as an internal think tank, identifying industry challenges and creating innovative solutions. Additionally, it supports portfolio companies by understanding and leveraging their expertise to solve some of their most profound problems</p>
