<b>Business Description:</b>	<p><b>Advanced Blockchain AG: Access to Web3 Investments</b>            Advanced Blockchain AG is a publicly traded blockchain venture builder focused on fostering, building, and investing in disruptive technologies, including token investments. Its primary markets lie in the venture capital sector for companies operating within blockchain technology, with a particular focus on decentralized finance and infrastructure projects that enable Web 3.0. The company's business model is based on three pillars:</p> <p><b>Smart Capital Investments:</b> Strategic capital allocation and portfolio support. AB Capital serves as the investment arm, uniquely positioned to provide smart capital to entrepreneurs at every stage of the business lifecycle. Advanced Blockchain's portfolio companies can fully leverage resources provided by AB Labs and AB Research enabling them to accelerate growth, refine innovations, and scale operations. This structure allows the company to offer shareholders early access to attractive and exclusive Web3 opportunities, delivering long-term value to global investors, partners, and communities.</p> <p><b>Proactive Venture Building and Incubation:</b> An integrated approach to developing and scaling ventures. AB Labs acts as a hub for like-minded founders seeking to advance their ideas through Advanced Blockchain's venture-building framework. The company equips entrepreneurs with the necessary resources to develop and scale their concepts, while also identifying additional opportunities for integration across Advanced Blockchain's holistic ecosystem. The</p>

	<p>labs and research teams work closely together to develop valuable and essential solutions supported by the right talent, resources, and tools to scale the business efficiently and successfully.</p> <p><b>Holistic Research and Education:</b> Comprehensive research initiatives and educational programs. AB Research plays a central role in shaping the future of Web3 by analyzing, theorizing, developing, and implementing solutions for the industry's most pressing issues. As an internal think tank, the research department identifies industry challenges and drives the creation of innovative concepts. It further supports portfolio companies by leveraging their expertise to address and solve complex technical and strategic problems.</p>
