

Integration Setup

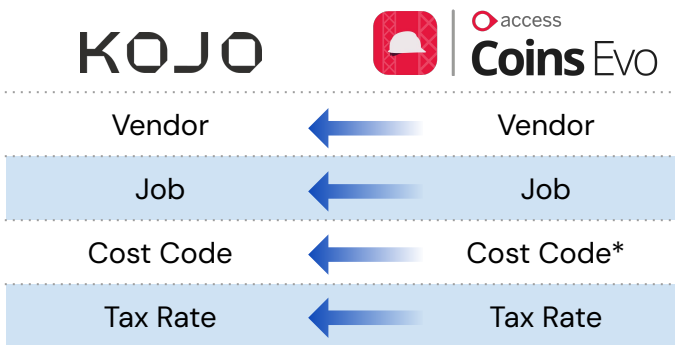

1 Hour

Kojo will work with you to setup the integration with Coins. This involves setting up a Coins user with the required permissions. Kojo does the rest!

Supported Data

Coins to Kojo

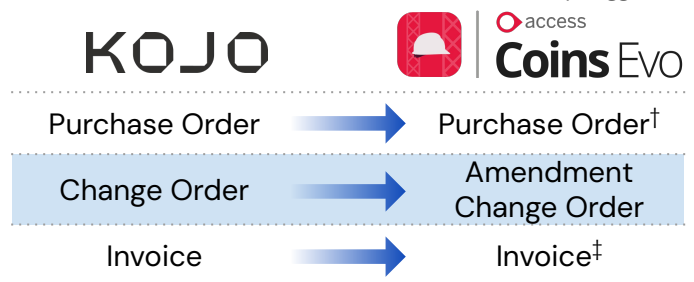

Every 1 Hour

* WBS Code (Optional) + Cost Type

Kojo to Coins

1-3 Minutes
(Manually Triggered)

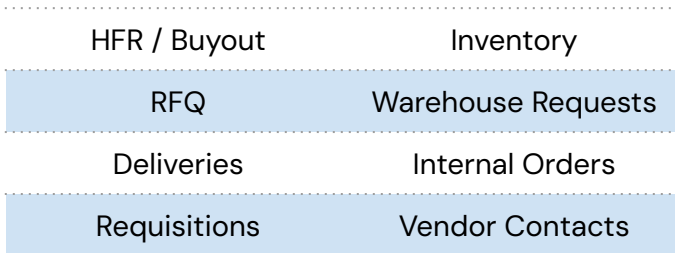

[†] Purchase Orders link as Job-based Material Orders; Can be linked as Normal (w/ quantities) or Lump sum type

[‡] PO-based and Job-based Invoices will link based on configured Transaction Types

Unsupported Data

Data in Kojo that is not currently linked to or doesn't exist in Coins[◇]

[◇] Additional feature requests including, but not limited to, unsupported entities, field mappings, and/or integration logic will require scoping and may affect overall pricing and onboarding timeline

Technical Requirements

Web Services License
Must be on Coins v11.13 or later

Notes:

- Supports a single Coins company to a single Kojo environment
