

INSTALLATION TIPS

1 Add sensor and see install instructions at: alertaq.com/addsensor. If you have purchased Professional Services to pre-register your sensor, skip to step 2.

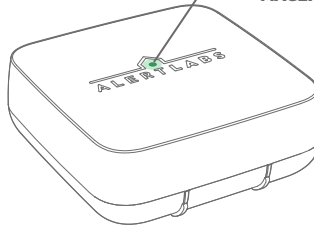

2 Make sure you already have a cellular sensor nearby with a green LED. Floodie requires a cellular sensor that is connected to a cellular signal.

3 Pull the tab to activate the batteries

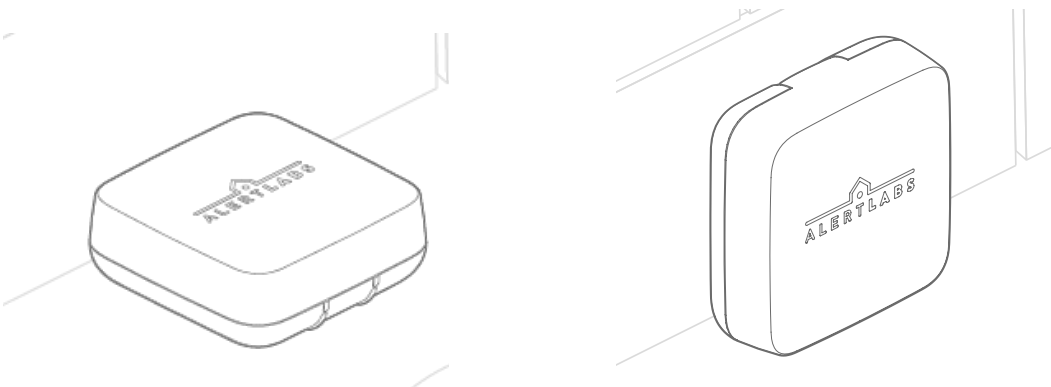

WHITE - Start Up
GREEN - Good Signal
RED - No Signal
YELLOW - Low Battery
BLUE - Flood
MAGENTA - Upgrading

4 Confirm LED is blinking green.

5 Decide on the location for the floodie so that the metal contacts are touching the floor. The sensor can be set flat or vertical.

6 Place the Floodie in the location that has been named on its label (e.g. 'Unit 305 Dishwasher')
