

KwantSure

CERTIFICATE OF INSURANCE (COI) MANAGER

Streamline Compliance, Protect Your Workforce, Reduce Risk

The **Kwant COI Manager** centralizes insurance and trade partner documentation, automates alerts for expiring certificates, and supports compliance with your insurance requirements across projects.

With **KwantSure by WTW**, contractors get instant COI access, digital insurance purchase, and smarter risk management, all in one platform.

Tested Across:
\$90B+ portfolio
of large-scale
projects

Key Features

- **Centralized COI Repository:** Upload and manage all certificates, licenses, and trade partner documents.
- **Automated Alerts & Reports:** Daily notifications for expiring or missing insurance documents.
- **Workforce Insights:** View all worker/subcontractor information in one dashboard.
- **Field-Proven Results:** Faster compliance, less administrative burden, fewer fines, reduced exposure.
- **Instant COI Access (KwantSure):** Real-time verification for contractors.
- **Coverage in Minutes (KwantSure):** Subcontractors can procure General Liability, BOP, Professional Liability, and Cyber (Workers Compensation coming soon).
- **Data-Driven Underwriting:** Smarter risk assessment with prefilled verified company data.

Why COI Management Matters

Without verified insurance, companies face risk from on-site incidents or claims. The **COI Manager + KwantSure** help to:

- Reduce liability and exposure
- Streamline compliance with your insurance requirements
- Provide instant proof of coverage

Benefits

- Verified coverage & liability protection
- Centralized, easy-to-access documentation
- Reduced admin burden and human error
- Loss prevention & fraud reduction via IoT sensors, audits, alerts
- All-in-one platform: quote, bind, and pay

Insurance Types Supported

- General Liability
- Professional Liability
- Business Owners Policies
- Cyber Insurance
- Workers Compensation (coming soon)
- Employer Liability (coming soon)

Kwant COI (Certificate of Insurance) Roadmap

COI Tracking – Prospective Features

AI-Based Document Analysis

Automate COI verification and compliance tracking through intelligent field extraction and validation.

Field Extraction

Automatically capture key Certificate of Insurance (COI) details:

- Policy number
- Effective and expiry dates
- Coverage types and limits
- Named insured and project-specific endorsements
- Insurance carrier information

Automated Compliance Validation

Ensure every COI meets project and company requirements:

- Validate coverage limits against project thresholds
- Flag expired or soon-to-expire policies
- Detect missing endorsements or exclusions
- Compare extracted data against predefined compliance rules

Integration with Worker & Subcontractor Profiles

Connect insurance data across your workforce ecosystem:

- Link COIs directly to vendors and workers
- Enable real-time verification during onboarding and site access
