Printers Registration – Step 2

WARNING: The “Installation d’uniFLOW Online” procedure must be completed before registering a badge.

Access to the printers is by Camipro card (=badge). The first time you use the printer, you must register your badge. To do this, take the “card registration code” from your uniFLOW interface.

When you are in front of the printer, swipe your badge over the reader provided. You will be asked for the code (only the first time). Enter the code and validate it.

You can now connect to the printer simply by passing your badge over the reader provided.
