

ROBO.

Task Chair

The Robo is designed for compact efficiency, with a monolithic frame that maximizes comfort within a 0.4m² footprint. Perfect for small offices, tight workstations, or dynamic shared environments, it delivers mobility without compromise. Crafted in five minimalist colours—Grey, Red, Mint, and Blue—it embodies contemporary monochromatic design trends. The anti-UV mesh, enhanced with German coating technology, blocks 99% of UV rays to resist fading and degradation. Its 3D elastic honeycomb structure increases airflow by 40%, doubling durability compared to standard mesh and ensuring long-lasting performance.
