

MY CANcer Code | Advanced genomic testing for pancreatic cancer patients

Your cancer has a code. Understand it to change the conversation.

WHAT IS MY CANcer CODE?

A no-cost program from Pancreatic Cancer North America (PCNA), in partnership with OncoHelix, that helps eligible patients across Canada access advanced genomic testing.

WHY GENOMIC TESTING MATTERS

- Looks for genetic changes that may be driving your cancer.
- May help your healthcare team consider more personalized options, including targeted therapies, chemotherapy, immunotherapy or clinical trials.

YOU MAY BE ELIGIBLE IF YOU:

- Are 18 years of age or older
- Have a confirmed diagnosis of pancreatic cancer
- Live in Canada
- Have a physician complete and sign the test requisition
- Register with PCNA as part of the program process

Already had genomic testing? You may still be considered. Previous testing is reviewed case by case.

HOW TO GET STARTED

1. Register with PCNA
2. Talk with your physician
3. Physician sends requisition
4. Testing & results

Results are typically available about 21 days after OncoHelix receives the sample and are shared with you and your ordering physician.

READY TO TAKE THE NEXT STEP?

Register at pancreaticcancernorthamerica.ca/mycancercode while you speak with your healthcare team. Testing must be ordered by a physician.
