

Indonesia Women's
Leadership Accelerator

LeadHER Forward

MDF
EMPOWERING PEOPLE.
CREATING IMPACT

**Stronger women
Stronger teams
Better workplaces**

Women play critical roles across industries. They lead teams, manage production, and keep operations running every day. However, women's leadership skills are not always developed in a structured way. LeadHER Forward is designed to change that.

Building on the success of the Indonesia Women's Leadership Accelerator Wave 2 (IWLA-2), this program focuses on practical leadership skills that can be applied directly at work. Participants will have the opportunity to strengthen their confidence, communication, and decision-making capacity so they can lead with clarity and bring impact.

For companies, the benefits are clear: stronger team performance, better collaboration, and real progress in advancing gender equality, ESG commitments, and social compliance.

Learning Period:

July - October 2026
(Blended Learning)
