

ISARSOFT

On-board insights without the overhead

Isarsoft Perception directly
on Axis cameras

Local processing, taken to its logical conclusion

01 Install in minutes:

Deploy Isarsoft Perception directly through the Axis Camera Application Platform.

02 Lower investment costs:

Eliminate the need for dedicated edge or server hardware in smaller deployments.

03 Trusted accuracy:

Benefit from the same reliable AI models and proven anonymization technology as in the desktop version - now running locally on the camera.

04 Intuitive usability and implementation:

Add counting lines and zones, apply settings, and edit multiple camera applications at once in seconds.

05 Zero video leaves the camera:

Only anonymized metadata is transmitted, keeping data secure and compliant by design.

06 Seamless scale-up:

Start with Isarsoft Perception for Axis and scale as your needs grow - no rip-and-replace required.

Available on Axis cameras
with ARTPEC-9 / CV75 chipset

- ✓ Accurate & intuitive APC
- ✓ Enhanced insights about passenger flow & demographics
- ✓ No extra server

Certified for
vehicle deployment

Built for transport analytics

Rolling stock has no room for extra hardware. Isarsoft Perception Axis App doesn't need any, because the app is purpose-built for deployment in vehicles with its space- and power-constrained environments and for small stations.

Road vehicles

Rail vehicles

Why Isarsoft

Based in Munich, Isarsoft has been building its reputation as a reliable partner in video analytics since 2019. Our mission: to unlock the potential of existing security camera systems using AI. Known for reliability, flexibility, user-friendliness, and versatile integration capabilities, Isarsoft helps organizations optimize operational workflows, increase safety, and boost customer satisfaction. Starting with passenger counting, our portfolio now encompasses passenger flow analysis, queue management, demographics, and more.
