

FOR SALE

Delage D1, 1924, IL DRAGO RUGGENTE

THE 27-LITRE ISOTTA-FRASCHINI V12 SPECIAL

A MACHINE WITH NO COMPARISON

There are special cars, there are racing cars - and then there are machines that simply have no comparison. Il Drago Ruggente - The Roaring Dragon - is one of them. Conceived and hand-built by Swedish craftsman Glenn Billqvist between 2009 and 2012, it was inspired by the heroic racing and record-breaking machines of the 1920s and 1930s.

THE HEART OF THE DRAGON

27 LITRES | V12 | SUPERCHARGED | ~750 HP

Isotta-Fraschini Delta R.C.351 inverted aircraft engine

An engine of this scale and provenance would be remarkable simply as a museum exhibit. Here, it forms the beating heart of a fully realized automobile, a hand-crafted, operational piece of mechanical theatre built to be seen, heard and experienced.

ONE-OFF. HAND-BUILT. UNREPEATABLE.

A COLLECTOR'S OPPORTUNITY

Built around a period Delage DI-D8 chassis, the enormous V12 is paired with a heavy-duty 1940s Ford truck gearbox and clothed in a completely hand-crafted aluminium and steel body whose proportions recall the great competition specials of the interwar years.

The aviation influence continues into the cockpit, where 13 aircraft and automotive instruments surround the driver. The hand-painted dragon and race number 5 complete a machine whose character is as unmistakable as its mechanical specification.

Not a replica. A creation in its own right.

Part racing special, part engineering sculpture and part celebration of an age when imagination often mattered more than convention. For a serious collector, museum or enthusiast, Il Drago Ruggente represents an opportunity unlikely to be repeated.

TECHNICAL HIGHLIGHTS

ENGINE	Isotta-Fraschini Delta R.C.351 inverted V12
CAPACITY / INDUCTION	27 litres / Supercharged
