

Searles®
HORTICULTURAL
MIX-INS

Coarse Sand

Searles Horticultural Mix-Ins Coarse Sand is a natural, coarse grade sand used to improve drainage and aeration in potting mixes.

When blended with potting media, Coarse Sand helps loosen compacted mixes and create an open structure which allows excess water to freely drain and improve air flow. Coarse Sand assists in healthy root development in specialty mixes where plants need good drainage.

Searles Horticultural Mix-Ins Coarse Sand is ideal for cacti, succulents, bonsai and other open potting mixes where drainage and air movement are essential.

HOW TO USE

FOR CACTI,
SUCCULENTS
& BONSAI

Improves drainage and airflow, helping prevent root rot in open potting mixes.

1. For plants that prefer excellent drainage, mix 1 part Premium Coarse Sand with 2–3 parts potting mix.
2. Blend evenly and plant as required.
3. Water gently and avoid overwatering.

FOR IMPROVED
DRAINAGE
IN POTS

Helps create a more open mix with improved water movement.

1. Add 1 part Premium Coarse Sand to 4 parts potting mix when potting plants that require better drainage.
2. Blend thoroughly before planting.

CREATE A
DRAINAGE
LAYER IN POTS

Using a Coarse Sand layer helps prevent blocked drainage holes and improves water movement through the pot.

1. Place Premium Coarse Sand at the base of the pot to a depth of 2–3cm.
2. Fill the pot with potting mix and plant as usual.

WARNING: Read detailed Health Warning below before opening and using product. Wear gloves, wear a mask and wash hands after use.

This product is not classified as hazardous, however dust may be generated during handling. Use as directed.

This product is a horticultural mix-in material intended to improve aeration, drainage, moisture retention, or growing conditions when blended with potting mixes or used in garden applications. It does not contain composted organic matter or added microorganisms.

RISK

Inhalation of dust may cause mechanical irritation to the nose, throat, or respiratory tract. Dust particles may cause mild eye or skin irritation.

SAFETY

Avoid breathing dust. Avoid contact with eyes. Use in a well-ventilated area. Wear suitable protective clothing and standard duty gloves (AS/NZS 2161.2). If exposed to dust, also wear dust-resistant eye protection (AS/NZS 1336) and a particulate respirator (AS/NZS 1715 and AS/NZS 1716). Wash hands thoroughly after use. Work clothes should be washed regularly. Store in a dry location.

FIRST AID

Irrigate eyes with plenty of water for 10 minutes. Wash skin with soap and water. Seek medical attention for any persistent skin, eye or respiratory symptoms.

DISPOSAL

Dispose of unused product and empty packaging in accordance with local council waste guidelines.

For further information refer to the Safety Data Sheet (SDS).

WARNING: READ DETAILED HEALTH WARNING LABEL ON THIS BAG BEFORE OPENING AND USING PRODUCT. WEAR GLOVES, WEAR A MASK AND WASH HANDS AFTER USE.
