

Searles®

HORTICULTURAL
MIX-INS

Vermiculite

Searles Horticultural Mix-Ins Vermiculite is a naturally occurring, lightweight mineral ideal for germinating seeds and supporting early root development.

When added to potting mixes, Vermiculite absorbs and gradually releases moisture, improving moisture regulation and maintaining aeration in the mix.

Searles Horticultural Mix-Ins Vermiculite improves seed germination and supports healthy root development by maintaining ideal growing conditions.

Vermiculite is especially useful in seed trays, propagation, indoor pots and hanging baskets.

HOW TO USE

FOR SOWING SEEDS

Vermiculite helps retain moisture around seeds while keeping the mix light, supporting even germination.

1. Fill seed trays or pots with Searles Seed Raising Specialty Mix.
2. Sprinkle Vermiculite over the surface at a ratio of 1 part Vermiculite to 4 parts Seed Raising mix.
3. Sow seeds as directed and gently water in.

1 Part

Vermiculite

4 Parts

Potting Mix

HANGING BASKETS & POTS

Helps reduce drying out between watering while remaining lightweight.

1. Before planting, mix 1 part Vermiculite with 4-5 parts potting mix.
2. Blend evenly and plant as required.

WARNING: Read detailed Health Warning below before opening and using product. Wear gloves, wear a mask and wash hands after use.

This product is not classified as hazardous, however dust may be generated during handling. Use as directed.

This product is a horticultural mix-in material intended to improve aeration, drainage, moisture retention, or growing conditions when blended with potting mixes or used in garden applications. It does not contain composted organic matter or added microorganisms.

RISK

Inhalation of dust may cause mechanical irritation to the nose, throat, or respiratory tract. Dust particles may cause mild eye or skin irritation.

SAFETY

Avoid breathing dust. Avoid contact with eyes. Use in a well-ventilated area. Wear suitable protective clothing and standard duty gloves (AS/NZS 2161.2). If exposed to dust, also wear dust-resistant eye protection (AS/NZS 1336) and a particulate respirator (AS/NZS 1715 and AS/NZS 1716). Wash hands thoroughly after use. Work clothes should be washed regularly. Store in a dry location.

FIRST AID

Irrigate eyes with plenty of water for 10 minutes. Wash skin with soap and water. Seek medical attention for any persistent skin, eye or respiratory symptoms.

DISPOSAL

Dispose of unused product and empty packaging in accordance with local council waste guidelines.

For further information refer to the Safety Data Sheet (SDS).

WARNING: READ DETAILED HEALTH WARNING LABEL ON THIS BAG BEFORE OPENING AND USING PRODUCT. WEAR GLOVES, WEAR A MASK AND WASH HANDS AFTER USE.
