

WE ARE LOOKING FOR

# US Sports Trader

We don't guess outcomes - we calculate probabilities.

Ematiq is a Prague-based technology company and a leading market maker on global betting exchanges. We build proprietary algorithmic platforms processing millions of data points in real time.

We are expanding our trading desk in US Sports and Prediction Markets.

## What will be your responsibilities?

- US Sports Trading - Monitor and manage positions across NFL, NBA, MLB, and NHL (pre-match & live). Work with our models, react to market movements, and improve pricing efficiency.
- Prediction Markets - Apply probabilistic thinking to binary and event-driven markets beyond sports. Identify inefficiencies and support liquidity provision.
- Execution & Risk - Take responsibility for execution quality and risk exposure. Contribute to PnL through disciplined decision-making.
- Collaboration - Work closely with Quants and Developers. Your market insights help refine our models and strategies.

## The Ideal Candidate

- Strong analytical and probabilistic thinking (EV, variance, risk).
- Good understanding of US sports and how information translates into price.
- Interest in trading and financial or prediction markets.
- Calm, curious, and eager to improve.

## Why Ematiq?

- Real exposure to live trading and capital allocation.
- Steep learning curve in algorithmic and prediction markets.
- Meritocratic, low-bureaucracy environment.
- Modern offices in Prague - Smíchov.
