

**OCTANE** **SUB 4**

**CERAMIX** *Edition*

**RGK**

**MADE-TO-MEASURE.  
MADE TO BE SEEN.**

Introducing the Octane Sub4 CeramiX Edition, featuring an advanced ceramic-based finish engineered to enhance durability without compromising weight.

More than durability, CeramiX unlocks a new level of visual customisation, combining made-to-measure engineering with refined aesthetics.

The result is a finish that looks premium and performs to the standards you expect from RGK.

## ***THE OCTANE SUB4. REDEFINED.***

The classic Octane Sub4 design has been re-imagined, the result is a hand crafted, made-to-measure Grade 9 titanium frame, finished with an advanced ceramic coating and guaranteed transport weight of under 4kg.

Each CeramiX Edition is built with a curated selection of premium components including Black Eagle brakes, carbon side guards, carbon fibre footplate, and black carbon fibre blade wheels.

These options have been chosen to complement the performance-focused nature of the Sub4, ensuring it is the lightest weight possible.

## ***A LIMITED RUN***

The Octane Sub4 CeramiX Edition is being introduced for a strictly limited production run. This ensures CeramiX is paired with a platform where precision, weight and durability truly matter.

Each CeramiX Edition chair carries its own number, discreetly stitched into the backrest. A permanent marker of its place within the production run.

## **BEYOND PAINT**

Inspired by aerospace and motor sport engineering, CeramiX is an advanced ceramic-based coating designed to deliver exceptional durability without adding weight. Its ultra-thin, high-density layer contains microscopic ceramic particles suspended within the coating, creating a resilient protective barrier.

This preserves frame detail and precision while offering increased protection against corrosion, scratches and everyday wear.

## **CHOOSE FROM SIX FRAME COLOURS**

This deliberate limitation ensures focus, precision and repeatability in the coating process, delivering a consistently high-quality finish across every frame.

Gloss finishes provide enhanced surface protection, while matte finishes prioritise visual character with a more understated aesthetic.

## **SANDSTORM**

Warm. Grounded. Effortlessly refined.

Sandstorm reflects the growing shift toward natural neutrals in premium design. Calm, balanced and modern, it enhances the form of the wheelchair without overpowering it. An understated finish designed to outlast trends.

## ***STEALTH GREY***

Clean. Precise. Confidently understated.

Stealth Grey draws from modern minimalism and high-performance design. Subtle yet purposeful, it allows engineering, detail and function to take centre stage. A refined technical aesthetic with quiet confidence.

## **HUNTER GREEN**

Heritage-inspired. Quietly confident.

Hunter Green takes cues from classic utility and performance design. Deep, rich and timeless, it delivers a finish that feels established and purposeful. Designed to age beautifully.

## ***ICE WHITE***

Pure. Minimal. Strikingly modern.

Ice White offers a crisp, refined finish that highlights the precision of the frame. Bright yet balanced, it creates a calm and sophisticated presence. Bold through simplicity.

## ***VOLT YELLOW***

Energetic. Fearless. Performance-driven.

Volt Yellow is made to be seen. Vibrant and full of energy, it reflects movement, momentum and confidence in action. A finish that amplifies the dynamic form of the wheelchair.

## **JET BLACK**

Bold. Timeless. Unapologetically strong.

Jet Black delivers a powerful, high-impact finish that never goes out of style. Sleek and uncompromising, it accentuates every contour of the chair. A statement in its purest form.

## ***BE ONE OF THE FIRST***

The Octane Sub4 CeramiX Edition is a strictly limited production run. Secure your place among the first to experience RGK's most advanced finish yet.
