

Teaching Through the Noise

Teachers face an invisible but constant auditory strain from crowded, noisy classrooms that can quietly erode their hearing over time. **The following data points highlight the scale of the issue.**

NOISY

crowded classrooms
impact teacher
well-being

42%

of teachers
showed poor or
insufficient hearing

*Early hearing checks
helped teachers stay at
work and avoid disability*

65%

of teachers reported
hearing complaints
tied to school noise
levels

23%

of teachers have
hearing related
dizziness

Tuned

Supports educators with early detection and prevention strategies
to safeguard their hearing and career longevity.
