Flying Through the Noise

Pilots, crew, and ground staff navigate a sonic landscape where noise is both a hazard and a constant. **The following data points highlight the scale of the issue.**

4 IN 10

pilots hear ringing in their ears
for more than 5 minutes a year

CABIN NOISE SITS AROUND

60 TO 88dB

spiking near 100dB
as loud as a vacuum cleaner

53%

of airport ground crew
have hearing loss.
1 in 3 cases linked to job noise

JET ENGINES CAN HIT

140dB

louder than a gunshot
posing severe risks to ground crews

Tuned
Ensures that everyone in aviation—from the cockpit to the tarmac—has access to the hearing support they need.
