

ANGULUS

SS27

SPRING SUMMER 2027

WOMEN'S COLLECTION

This season explores a more expressive side of femininity, where soft silhouettes meet a confident sense of character.

Refined classics are reimagined through sculptural proportions, architectural lines and the introduction of new heels, creating a collection that balances elegance with a contemporary edge.

From everyday essentials to statement styles, each design is created to move effortlessly through the many moments of modern life.

Rich textures and carefully considered detailing define the collection.

Supple leathers are enhanced with braided finishes, embossed floral patterns and distinctive ostrich-inspired textures, adding depth and tactility throughout.

A warm palette of earthy neutrals is complemented by subtle accents of soft pink and fresh green, while deep burgundy emerges as a new signature shade, bringing richness and versatility to the season.

Handcrafted in Portugal from natural materials, ANGULUS combines Danish design values with generations of shoemaking expertise. Every pair reflects a commitment to comfort, quality and enduring craftsmanship, designed to be worn and treasured for seasons to come.
