DOF Group ASA is a leading provider of essential offshore and subsea services to the global offshore energy industry, and has vessels operating in all major oil and gas regions. We operate within three different business segments in relation to strategic types of activities and vessel types: Subsea vessels (Subsea), Anchor Handling Tug Supply vessels (AHTS), and Platform Supply Vessels (PSV).

All specifications are subject to changes without prior notice.
Please contact DOF for details and verifications.

Subsea

Subsea vessels are the most complicated in the DOF fleet. Diving vessels, well stimulation vessels, pipe lay vessels, multipurpose support vessels, and others belong in the category.

Geoholm
