The DS-67 iQ can be custom configured

Increase Processing Efficiency

- A single multi-functional feeder
- An intuitive easy-to-use control panel

Prepare Invoices and Statements

- Two multi-functional feeders
- Finished envelope side exit
- Store and recall up to 50 jobs

Easily Create Marketing Mail

- Crisply fold up to 8 pages
- Load 1,200 inserts or 325 BREs with optional MaxiFeeder

Add Business Reply Envelopes

- Feed sheets, inserts or BREs
- High-capacity vertical stacker
- Automate multi-sheet documents

Versatile, intuitive and productive

The DS-67iQ folder inserter can accommodate a wide range of documents, inserts and business reply envelopes (BRE) making it the ideal choice for a variety of applications and office environments. The DS-67iQ combines unparalleled ease-of-use with advanced technology. The intuitive color touch screen control panel prompts the operator through each step of job setup and operation. Quadiant Remote Assistance enables folder inserter diagnostics and operator support to increase mail assembly productivity.

Easy operation

The color touch screen display and automatic job setup make the DS-67iQ exceptionally easy to use. Simply load envelopes and documents and the DS-67iQ will adjust all settings automatically and even save them to the memory for instant recall. And, with automatic adjusting feeders, it can't get any easier.

Multi-page processing

Efficiently and accurately assemble and process multi-page sets. The internal CIS scanner reads inserter control codes (1D, 2D) which can be printed nearly anywhere on the document, providing superior document security and integrity as well as saving you hours getting your mail out faster.

DS-67iQ

1. High-Capacity Vertical Stacker

Preserves printing order and holds up to 500 finished envelopes so operators spend less time unloading

2. Touch Screen Display

7" color graphical interface with wizard-based programming makes operation simple and intuitive

3. Feeder Linking

Continuous operation is achieved by linking feeders. If one feeder runs empty, another one automatically takes over, allowing you to refill as needed until your job is complete

4. Envelope Hopper

150-envelope capacity with on-the-fly reloading

5. Automatic Collator

Collate and fold up to 8 pages together

Processing flexibility

DS-67iQ's FlexFeed function allows you to process all document formats (inserts, documents and business reply envelopes, etc.). Additionally, the "Daily Mail" function even allows hand feeding of multi-page stapled document sets.

Efficient processing

Load the feeders, and the DS-67iQ will accurately assemble the documents, fold, insert and even seal the finished envelopes, all in one quick process. The high-capacity envelope stacker is designed to improve accessibility and unloading of envelopes on the fly.

SPECIFICATIONS

Processing speed	Up to 2,500 envelopes / hour
Folding capacity	Up to 8 sheets 20 lb. single fold
Multi-document feeding	Up to 3 documents
Monthly volume	20,000/month
7" Color touch screen	Standard
