

ResMan[®]

ReportsPro

Flexible Reporting — Just the Way You Want it to Be!

ReportsPro offers the flexibility to create and publish reports with the data, format, and style that's right for your teams. Reports are customized right in the ResMan platform through an easy-to-use drag-and-drop interface — no SQL or programming expertise required! Now you can get the reports you need without any hassle or delay!

Manipulate and Save Reports: Create new reports by making adjustments to existing reports. Change formatting, add/remove/reorder fields, add/change filters, or insert images and visual representations. Once complete, reports can be published, batched, and scheduled just like standard ResMan reports.

Easy to Learn and Use: ReportsPro is a tool for you and your team – not just for the tech folks! With a drag-and-drop interface, user-friendly field names, and validation logic to ensure new reports make business sense, it's easy for anyone onsite or in the corporate office to create reports. But since access is controlled by permissions, it's up to you to decide who gets to use it.

Share Information More Efficiently: Every organization has different reporting needs and preferences. ReportsPro offers the right flexibility without the complexity that usually comes with reporting tools. It minimizes the need for data manipulation in tools like excel, and for organizations with corporate BI solutions, it makes formatting and extracting data for these tools even easier!
