Tree Tops

Tree Tops is a site-specific home designed to serve the needs of a professional couple and their extended families. The property has distant views of the coast and outer islands. The Whitten Architects team worked with the clients to design a multilevel home with privacy and outside living spaces in a developed subdivision. The design features a lower level walk-out with gym and golf simulator area; entry-level front hall, mudroom, guest suite, and open-riser stair; second-level primary suite and shared home office; third-level guest suite; and fourth-level open-plan living, dining, and kitchen space with screened porch and view balcony. An exterior stair with porches provides private outside access to all levels.

ARCHITECT: **Whitten Architects**
 PROJECT TEAM: **Rob Whitten, principal; Roo Collins, project architect; Jesse Patkus, designer**
 BUILDER: **Bowley Builders**
 STRUCTURAL ENGINEER: **Albert Putnam Associates**
 CABINETRY: **Derek Preble**
