CUSTOMISATION OPTIONS

brunner ::

WAVE

wave combines elegance and functionality for sophisticated conference rooms. The striking wave shape of the table legs create a unique design, while the robust steel construction ensures maximum stability even with large dimensions. The flexible supporting structure, including a cable guide rail, allows for a wide range of table shapes and numerous customisation options.

Customisation options are available on request

To transform your table configuration into a unique product, you can choose from the following materials: a table top with a decorative metal finish or natural stone inlay, a pilaster strip in chrome or black chrome, and a frame cover in oak or walnut veneer, available in a wavy or slatted texture and in natural or stained wood.

Customisation options for table tops

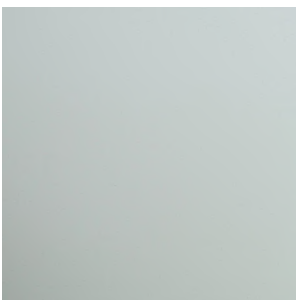

The cable lid E380 can be used with all inlays.

Leather from the torro collection

Decorative metal laminates

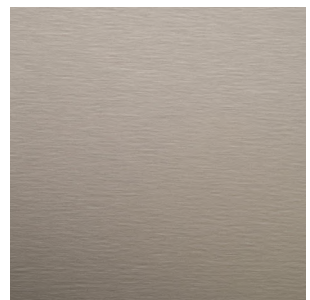

Aluminium, brushed natural

Aluminium, brushed matt copper

Aluminium, brushed matt bronze

Aluminium, brushed light matt bronze

Natural stone inlays

Natural stone inlays

Taj Mahal and **Negresco**: Robust quartzite, also ideally suited to harsh conditions in heavily used areas. Satin-finish surface (matt and slightly textured).

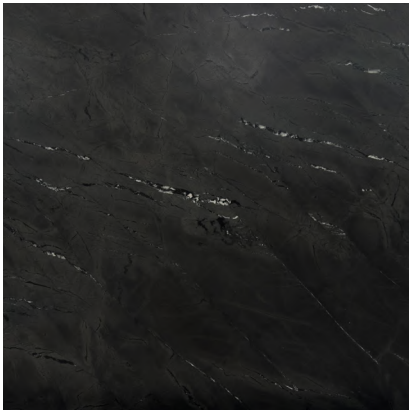

Super White: Carbonate stone (marble), conditionally acid-resistant. Polished surface, variations across the slab depending on the mineral composition (satin gloss to high gloss).

Calacatta Vagli: Carbonate stone and acid-sensitive. The polished surface has a homogeneous high degree of gloss.

Emperador, **Fior di Bosco** and **Sahra Noir**: Carbonate stone, sensitive to acids. Polished surface with natural variations across the slab depending on the mineral composition (satin gloss to high gloss).
