- (a) More narrow industries are utilized for compliance purposes, whereas broad sectors are utilized for reporting purposes.
- (b) Non-income producing security.
- (c) This security or a partial position of this security is on loan at March 31, 2021. The total market value of securities on loan at March 31, 2021 was \$129,406.

The Accompanying Footnotes are an Integral Part of this Schedule of Investments.

**SMALL COMPANY VALUE PORTFOLIO**  
**NOTES TO SCHEDULE OF INVESTMENTS**  
**March 31, 2021 (Unaudited)**

**1. Securities Valuation**

Securities listed or traded on U.S. exchanges, including options, futures, swaptions and swap contracts, are valued at the last sales price on the exchange where they are principally traded. In the absence of a current quotation, a security is valued at the mean between the last bid and asked prices on that exchange. Securities quoted on the National Association of Securities Dealers Automatic Quotation (NASDAQ) System, for which there have been sales, are valued at the NASDAQ official closing price. If there are no such sales, a security is valued at the mean between the last bid and ask prices. Securities traded over-the-counter (other than on NASDAQ) are valued at the last current sale price; and if there are no such sales, a security is valued at the mean between the last bid and ask prices. Debt securities are typically valued at an evaluated bid price by a third-party pricing agent employing methodologies that utilize actual market transactions, broker-supplied valuations, or other inputs designed to identify the market value for such securities. Third-party pricing agents often utilize proprietary models that are subjective and require the use of judgment and the application of various assumptions including, but not limited to, interest rates, prepayment speeds, and default rate assumptions. Debt securities that have a remaining maturity of 60 days or less are valued at prices supplied by the Portfolios' pricing agent for such securities, if available. Otherwise such securities are valued at amortized cost if the Adviser's Pricing Committee concludes it approximates fair value. Equity securities primarily traded on a foreign exchange are typically valued daily at a price as provided by an independent pricing service, which is an estimate of the fair value price.

Foreign currency contracts, including forward contracts, are valued at the applicable translation rates as supplied by the third-party pricing vendor. In the event market quotations are not readily available, such securities are valued at fair value according to procedures adopted by the Board of Directors (the "Board") or as determined in good faith by the Adviser's Pricing Committee, whose members include at least two representatives of Wilshire Advisors LLC, formerly known as Wilshire Associates Incorporated (the "Adviser"), one of whom is an officer of the Company, or by the Company's Valuation Committee which is composed of Trustees of the Company. Fair value is defined as the amount the owner of a security might reasonably expect to receive upon a current sale. Securities whose value does not reflect fair value because a significant valuation event has occurred may be valued at fair value by the Pricing Committee or the Valuation Committee in accordance with the Company's valuation procedures. Significant events may include, but are not limited to, the following: significant fluctuations in domestic markets, foreign markets or foreign currencies; occurrences not directly tied to the securities markets such as natural disasters, armed conflicts or significant governmental actions; and major announcements affecting a single issuer or an entire market or market sector. The value of fair valued securities may be different from the last sale price (or the mean between the last bid and asked prices), and there is no guarantee that a fair valued security will be sold at the price at which a Portfolio is carrying the security.

In accordance with the authoritative guidance on fair value measurements and disclosures under U.S. GAAP, the Portfolios disclose the fair value of their investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The objective of a fair value measurement is to determine the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Accordingly, the fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The guidance establishes three levels of the fair value hierarchy as follows:

- Level 1 – Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities that the Portfolios have the ability to access at the measurement date;
- Level 2 – Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, referenced indices, quoted prices in inactive markets, adjusted quoted prices in active markets, etc.); and
- Level 3 – Prices, inputs or exotic modeling techniques which are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. During the period ended March 31, 2021, there have been no significant changes to the Portfolio's fair value methodologies.

The following is a summary of the inputs used to value the Portfolio's investments as of March 31, 2021:

<b>Small Company Value Portfolio</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Common Stocks	\$ 35,798,269	\$ -	\$ -	\$ 35,798,269
Total	\$ 35,798,269	\$ -	\$ -	\$ 35,798,269

Refer to the Portfolio's Schedules of Investments for a listing of the securities by industry or sector type. Small Company Value Portfolio did not hold any assets or liabilities that were measured at fair value on a recurring basis using significant unobservable

inputs (Level 3) as of March 31, 2021.
