

CONTEXA PRODUCTION BOOST ALL IN ONE

For unrivalled efficiency in dosing production

REAL-TIME PRODUCTION

The CP-BOOST solution stands out for its exceptional speed - the fastest on the market. Simultaneous dosing means that all ingredients can be dosed instantly, with no preparation time, for optimal production responsiveness.

SPEED AND SUPERIOR FLEXIBILITY

This production machine massively speeds up production, in particular by adding last-minute orders. This advantage considerably reduces cycle times, from order to final customer delivery.

A COMPREHENSIVE SOLUTION

With the CP-BOOST solution, refilling is no longer necessary. All ingredients are dosed in the final container. The direct production line requires less manpower and equipment for production-related tasks such as cleaning, refilling and stock management.

BENEFITS

Volumetric and simultaneous dosing

Combination of COLIBRI and TEX technologies

Modular installation adapted to industrial spaces

Use of raw materials in suppliers' packaging

**ALL IN ONE:
FROM A SINGLE DROP TO A TONNE
IN THE SAME CONTAINER**

TECHNICAL SPECIFICATIONS

Performance: 1 000+ pours per hour

Productivity: 20+ formulas per hour

Smallest dosage: one drop

Footprint: from 50 sqm

Maximum batch size: 1 500 kg

Conveyor capacity: customisable

Customisable: +++

OPTIONS

DORY software

Life Cycle Services

Hot/Cold modules

Nitrogen blanketing

Several S/M/L conveyor types, L conveyor if several TEX

Tanks/Beakers: several types available

M conveyor unloading device

ATEX/IECEX/HASLOC/FOOD GRADE
