TEMPORARY WORKS UNCOVERED

The Scaffolding Playbook is an ongoing webinar series by EZICHEQ, designed to bring together experts, leaders, and innovators to share what's working - and what's not in today's scaffolding industry.

Each session explores real-world challenges, practical solutions, and new ideas to help your business move forward with greater confidence and control.

Webinar Overview

Temporary Works can often feel complex, with many areas open to interpretation. In this session, industry experts Susan Temple and Gus Montgomery shared their knowledge and experience to help bring more clarity, consistency, and care to scaffolding practice.

The discussion explored when to involve engineers, how to balance cost and compliance, and why open communication between designers and scaffolders is key to safer, more efficient outcomes.

Key Learning Outcomes

- **Clarity around when engineering input is needed**
- **Stronger communication between designers and scaffolders**
- **Better balance of cost, compliance and buildability**
- **Awareness of common causes of Temporary Works failures**
- **Understanding the role of the Temporary Works Forum (TWF)**
- **Practical steps to improve collaboration and accountability**

Takeaways

- **Communication saves time and reduces risk. Early conversations between designers, scaffolders, and engineers prevent confusion later on.**
- **Engineering involvement should not be an afterthought. It is better to have early engagement which leads to safer, more practical designs.**
- **Compliance doesn't have to slow you down, the right processes can make work smoother and protect everyone involved.**
- **Learning from real examples matters as every mistake or success adds value when shared across the industry.**
- **Temporary Works Forum (TWF) – a growing initiative helping raise the bar for Temporary Works practice and collaboration across New Zealand.**

EZICHEQ.COM

DELIVERING SAFER, SMARTER TEMPORARY WORKS WITH EZICHEQ

Plan your next tender with confidence. Ensure full compliance, transparency, and oversight — all supported by EZICHEQ.

EZICHEQ is a bespoke digital platform for managing scaffolds and temporary works. It gives you and your project partners real-time visibility of every structure, from inspection through to completion.

Every Temporary Works element can be tracked, verified, and managed to meet the highest compliance standards, fostering collaboration, accountability, and trust from start to finish.

DIVISIONS

Clear separation of sites and responsibilities, giving you instant clarity on progress and compliance.

TOTAL TRANSPARENCY

See exactly when, where, and by whom inspections were completed — with full date, time, and location records.

ALERTS

Instant notifications highlight priority actions so nothing is overlooked.

QUICK REMEDiations

Issues are identified and addressed fast, keeping the project on track.

AUTOMATED REPORTING

Tailored reports provide an accurate, auditable record for your project.
