- BlueCross BlueShield of TN PPO Network S Plan
- BlueCross BlueShield of TN PPO Network P Plan
- Cigna Local Plus Plan
- Cigna Open Access Plan

The Local Consumer-Driven Health Plan/Health Savings Account (CDHP/HSA) has the lowest monthly premium and in-network preventive care has no member cost. For most other services, you pay your deductible first before the plan pays anything, then you pay coinsurance (not copays).

Effective January 1, 2026, TASC will serve as the HSA vendor for CGLA and MEHP. CGLA/MEHP will contribute \$100 per month directly into your HSA, provided you maintain active enrollment in the corresponding health plan.

MEDICAL BENEFITS

Medical benefits are processed through Cigna and BlueCross BlueShield of TN (BCBST).

The Cigna plan offers options in both Local Plus and Open Access Plus Networks. The Local Plus option has a smaller network that includes Erlanger Hospital and TC Thompson's Hospital. Cigna's LocalPlus Network is a cost effective solution to help control medical costs. The OAP is Cigna's national network that includes most providers and hospitals (including Parkridge). As of 2/1/2026 CIGNA LP and OAP do not include Memorial Hospital or providers. Cigna plans are in network only. Cigna plans are available in all 50 states.

The BCBST plan offers options in both the S and P Networks. The S Network includes Erlanger and Parkridge hospitals (Memorial is no longer in the S Network). Providers in the S Network are subject to change. The P Network is BCBST's largest network and includes Erlanger, Parkridge, and Memorial hospitals.

When selecting a plan, make sure your physicians are in network. To find an in-network provider near you, go to www.mycigna.com for Cigna or www.bcbst.com for BCBST. Click on "Find A Doctor." Please be sure to consult either the online directory or the customer service department to confirm that your provider participates in the network.

PHARMACY

All health plans include full prescription drug benefits. The health plan you choose determines your out-of-pocket prescription costs, including copay, coinsurance, deductible and out-of-pocket maximum. How much you pay for prescriptions depends on several things, including:

- The drug tier: Your choice of a generic, non-preferred brand or specialty drug will help determine the price
- The quantity: The day supply you receive: A 30-day (or less than a 30-day) or a 90-day (greater than a 31-day supply).
- Where you fill your prescription: You can fill at a retail, Retail-90, mail order pharmacy or specialty pharmacy.
