

ISMAIL SEEDAT

WELL MONITORING SPECIALIST

📍 Batley, West Yorkshire ✉ ishy_seedat@hotmail.com ☎ 07845368514

Professional Profile

A pragmatic and multi-skilled professional with considerable expertise in the end-to-end delivery of large-scale oil rig management and well maintenance projects. An innovative strategist who has successfully managed major projects that have saved money and enhanced business processes. Specialises in building sustainable, long-term relationships with people from diverse social and cultural backgrounds, embedding a strong safety and quality focus across multiple functional areas.

Objective

Currently looking to take on a challenging new role within the oil sector, one which will make best use of existing skills and experience while furthering professional development.

Competencies

Well Monitoring • Project Management • Process Development • Operational Management • Revenue & Profit Growth • Risk Assessment & Management • Documentation • Quality Control • Strategic Planning & Analysis • Relationship Building • Commodity Management • Forecasting • Conflict resolution • Needs assessment • Decision-making • IT • Data Analysis

Technical Skills

Microsoft Suite • Power BI • List • Azure • Kongsberg • Intelie live monitoring software • GN4/GN5 • Well Placement software • Techlog • Gas analysis software • Fluid analysis software •

Career Summary

2019-Present
Wells Monitoring Specialist
Schlumberger

KEY ACHIEVEMENTS

- Assimilated project management knowledge to successfully provide support and coverage to BP rigs (assets), allowing for the safe drilling and completion of multiple wells.
- Ensured consistently high levels of project delivery and satisfaction by liaising with the rig team at all times, keeping everyone informed of any deviations from procedures, making sure everyone was working towards the same goal allowing the projects to completed on time.
- Drove cost reducing measure for BP by enhancing remote monitoring processes, improving scalability for the client, and gaining a better understanding of client interactions on a day-to-day basis.
- Developed knowledge of Well testing & completions, minimising project risks and failure.
- Furthered understanding of Gravel Pack operations.
- Advanced ability to understand and control a Well influx situations, allowing for the rectifying of any issues quickly, saving time and money.

RESPONSIBILITIES

- Overseeing the Lifecycle of high priority BP wells via procedural discipline from the drilling to completion, including the monitoring of well testing.
- Identifying areas of risk to the loss of well control through independent shore base monitoring and assessments.
- Logging levels of non-productive time to quickly identify areas of improvement and potential defects to avoid future downtime. Quantifying and assessing NPT and ILT to optimize operational procedures.
- Completing detailed analysis and applicable calculations on well activity, identifying, and implementing new procedures where necessary.

2011-2019
**Drilling
Optimisation
Engineer**
Schlumberger

KEY ACHIEVEMENTS

- Carried out well monitoring and analysed trend changes which led to the detection of a small change in the volume of fluid whilst drilling in the North Sea on a floating rig. Swift action and clear communication between teams allowed for the issue to be resolved in a timely manner, saving larger downtime and remediation from a larger influx.
- Safeguarded success rates by regulating communication lines between team members, keeping everyone informed changes, interruptions, or new risks, expelling any queries or concerns, minimising issues, and upholding a safe working environment offshore.
- Provided well monitoring, sensor, and system maintenance data reports directly to the client.
- Compiled complete set of well log identification and analysis of drill cutting for Geologist.
- Maintained all ML components and sensors required within the field.
- Demonstrated advanced communication abilities to develop strong relationships with clients which allowed for the negotiation of favorable terms and SLA's.
- Instrumental in delivering engaging staff training to the Field Service, ensuring the production of high-quality deliverables.

Previous Roles

Sales Assistant, Pound Express, 2010 – 2011.

Sales Assistant, Horizon Enterprise, 2006 – 2011.

Laboratory Assistant, Stephenson Group Ltd, 2007 – 2008

Temporary Sales Assistant, TOYS R US, 2003 – 2004.

Education & Certification

 **MSc - Advanced Chemical Engineering**, 2010 - Dissertation: *Sustainability of Biofuels*.

 **MChem- Chemistry with Chemical Engineering (2:1)** - Dissertation: Properties of Biodiesel & Lower glycerin content in soap.

 **IWCF: Drilling Well Control Level 4** (Supervisor – Combined).

Volunteer Work

- University of Leeds - Provided learning support to undergraduate students studying in the Petroleum Engineering course, utilising experience in the oilfield.
- Oxfam - Raised vital funds through various methods in a fight to a world living without poverty. This included sorting high quality donated fashion and photographing them for the website to market and sell.
- Dewsbury Hospital - Assisted the nursing team with daily patient care, building a rapport with patients to make them feel comfortable and at ease in a new environment.
