 **PEGA**  
**Constellation**

We help organizations leverage Pega Constellation modular, configurable architecture to simplify application building. By separating business logic from UI, Constellation reduces complexity, accelerates implementation, and ensures seamless, debt-free upgrades.

 **API-First & Stateless Architecture**

 **Prescribed, Modular UI**

 **Center-out, Microservices-Driven Design**

 **EvonSys Value Proposition**

**85% Increase** in User Satisfaction by Transitioning from Cosmos to Constellation

- **40% improvement** in system responsiveness, significantly enhancing operational efficiency.
- **50% reduction** in UI maintenance effort, decreasing deployment times and associated costs.

 **PEGA**  
**Upgrade & Migration**

EvonSys simplifies the upgrade and migration, turning complex tasks into smooth, low-risk transitions. Leveraging proven methodologies, advanced DevOps practices, and cloud-native solutions, we ensure every upgrade enhances your business capabilities without disruption.

 **Structured, Risk-Free Migration**

 **Containerized and Cloud-Native**

 **Continuous Modernization**

 **EvonSys Value Proposition**

**35,000** Business-Critical Rules  
**Zero Downtime**

- **Zero downtime** during a complex upgrade impacting over several hundred thousand daily
- **20-30% boost** in productivity across multiple departments due to upgraded UI/UX and automation features.

**Drive Measurable Outcomes in Your Pega Modernization Journey**

Successful Modernization Starts with Choosing the Right Partner

Global Elite Partner

# Experience You Can Trust. Transformations You Can Measure.

At EvonSys, modernization is all about your business outcomes. With a decade of leadership in complex, high-impact Pega transformations, we've successfully navigated some of the largest and most demanding journeys across industries.

## Why leading Organizations trust EvonSys

Deep Operational Expertise

Home-grown Tools and Accelerators

Established Track Record with Pega Solutions

10+ Years of INNOVATION

Trusted by 25+ INDUSTRY LEADERS

## Legacy Modernization

EvonSys specializes in transforming legacy back-office complexity into cohesive, automated processes, leveraging deep expertise in operations and systems integration.

Unified Orchestration

Operational Depth & Precision

Minimizing Risk, Maximizing Accuracy

## EvonSys Value Proposition

\$4 Million Annual Operational Savings 

- Account opening time reduced from days to just **2 hours**.
- Processing errors **reduced by 70%**.
- Customer satisfaction **improved by 30%**.

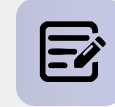

## Blueprint

As early adopters of Pega Blueprint, EvonSys accelerates initial project phases, combining Blueprint's strengths with our industry-specific templates, process-mining expertise, and proprietary accelerators.

Early Adopter of Blueprint

Rapid Requirements Clarity

Published Industry-Specific Blueprints

Integrated Process Mining

## EvonSys Value Proposition

50% Reduction in Project Start-up Time 

- **50% faster** move from requirements to development readiness.
- Significant improvements in requirement accuracy, minimizing rework.

## Infrastructure

EvonSys delivers unmatched visibility and proactive management of Pega infrastructure by integrating specialized monitoring tools optimized specifically for Pega environments.

Specialized Monitoring Solutions

Proactive Performance Management

Pega-specific Infrastructure Expertise

## EvonSys Value Proposition

Seamless Infrastructure Modernization & Cloud Migration 

- Seamless upgrade to the latest version of Pega.
- Successful migration from on-premises Oracle DB to AWS RDS PostgreSQL.
- Complete modernization leveraging cloud-native technologies.
