Copado AI Platform With Org Intelligence

Turbocharge Salesforce delivery with the full context of your Org

CO COPADO

Transform How Your Teams Discover, Build, and Deliver on Salesforce

Copado Org Intelligence provides deep visibility into your Salesforce environment through AI agents that understand your unique configuration including data model, automations, and architecture. Stop spending hours investigating Salesforce configuration or code and start building solutions that work the first time.

Why It Matters

80% reduction in org discovery time	**50%** faster production issue resolution	**50%** reduction in code creation time

Why Context Matters

- Better decision making
- Improved code quality
- Accelerated issue resolution
- Confidence to make changes
- Faster onboarding
- Improved collaboration

Capability	What It Does	Outcome
Org Intelligence	AI-powered insights into your metadata to accelerate Org Discovery, resolve issues faster, generate code that's tested and validated for deployment and onboard new team members in record time.	**Org-Specific** Solution Design User Stories Code Tests Release Notes Training Guides Documentation
Visual Diagrams	Instantly diagram and explain org structure, data model and flows	
Integrations	Interact with Copado AI directly on VSCode, Slack and Microsoft Teams.	

Who It's For

✓ **Business Leaders**
Gain confidence in delivery velocity and platform ROI.

✓ **Architects & Business Analysts**
Make faster, smarter design decisions with full org visibility and impact analysis.

✓ **Developers**
Generate high-quality, validated code that works in your specific org configuration.

✓ **Admins & Support**
Troubleshoot issues with AI-suggested fixes instead of lengthy investigations.

✓ **Business Analysts**
Translate requirements into org-aware stories using real-time diagrams.

Copado Org Intelligence in Action: Key Differentiators

Org Discovery
Helps business analysts, devs and architects understand any org in minutes — not hours

Rapid Resolution
Admins and support teams can troubleshoot and fix production issues fast with AI-driven guidance

Org-Ready Code
Developers write code that works the first time, tested and validated by AI in your development Org
