

Find your **global match.**

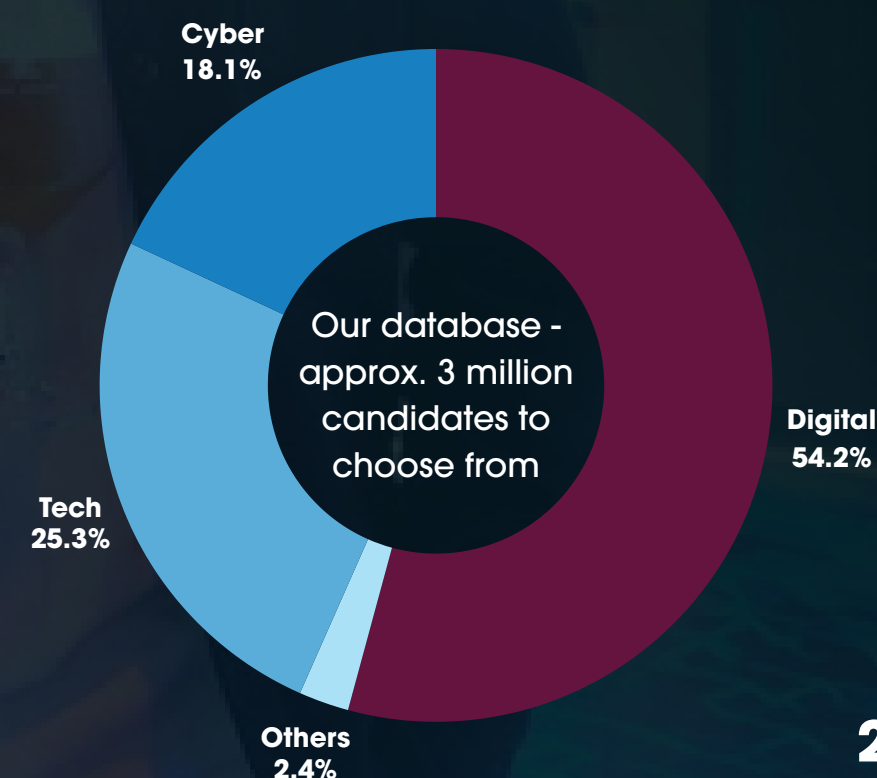

Digital, Tech & Cyber Recruitment

Priority Recruitment was founded in 2012 with a simple aim: to make recruitment more personal, straightforward and effective.

Since launching our specialist Emerging Tech division in 2019, previously known as Priority Crypto, we have supported more than 105 businesses and delivered over 550 placements across international markets.

Now operating as **Priority Tech**, we build on that experience with a clearer focus across three connected markets: Digital, Tech and Cyber.

Our Sectors

Digital

CREATE & CONNECT

We recruit Digital, Product, Transformation and Marketing talent across UX, UI, E-commerce, SaaS, CRM, Data, Customer Experience and Digital Marketing – from Product Managers to Digital Directors.

We recruit Technology and Engineering talent across Software, Cloud, AI, Data, DevOps and Emerging Tech - from Software Engineers to CTOs.

Tech

DESIGN & BUILD

Cyber

PROTECT & DEFEND

We recruit Cyber Security and Information Security talent across Cloud Security, AppSec, SecOps, GRC and Threat Intelligence - from Security Engineers to CISOs.

Our Timeline

We move into our current HQ at 39 Deansgate in Central Manchester.

Visited clients in Thailand, Dubai, Switzerland and London, strengthening our relationships.

We go through some BIG changes in the management team - New Priority, here we go!

We make recruitment **easy**.

With a trading AUM of \$1 billion, Master Ventures is a leader in building, launching, investing, and fostering growth in the blockchain and cryptocurrency sectors. Facing scaling challenges in the development department, Master Ventures engaged Priority Tech to identify and address them.

The Priority Tech team conducted a thorough analysis, including our full team working alongside the founders in Thailand, uncovering valuable insights that informed a bespoke talent acquisition strategy tailored to Master Ventures’ specific needs. As a result, we successfully recruited 35+ new positions, including community managers, mid- and senior-level engineers, and C-level executives.

From strategy to execution and analysis, our team continues to provide ongoing advisory services that have further shaped Master Ventures’ talent acquisition programme. This support has been instrumental in cultivating a dynamic and positive work culture, as well as implementing performance evaluation tools and frameworks.

In addition to strengthening internal infrastructure, our team collaborates with Master Ventures’ incubation and accelerator programmes to support start-ups invested in by Master Ventures. This partnership has resulted in effective growth and financial management for these emerging companies.

Discussing Your Requirements

We want to get to know you, your company culture and requirements to ensure we understand precisely how to build your team with the most suited candidates.

Headhunting, Qualifying & Presenting Candidates

We will work tirelessly to identify and interview candidates via video calls. We are experts in questioning and building personable relationships to ensure as many of your boxes are ticked! We will present you CVs/portfolios/GitHubs depending on their skill set, allowing you to make informed decisions on their suitability.

Interview Stage

We will facilitate the arrangements so you can spend your valuable time in other areas. Share your availability with us and we will take care of the rest, ensuring that candidates are well prepared and presented to the interview.

Offer & Aftercare Support

Guiding you through the offer stage and ensuring a smooth transition to the successful candidate's start date. We will then be on hand to provide any support you may need after the process is complete.

We have a variety of pricing structures designed to support the needs of our clients, including early-stage start-ups, expanding projects and well-established leaders in the sector. We take payments in many forms by arrangement, including fiat, stablecoin & tokens (vested and unvested).
