

# Frontline Mobile App

## Obzervr Digital Work Management Solution

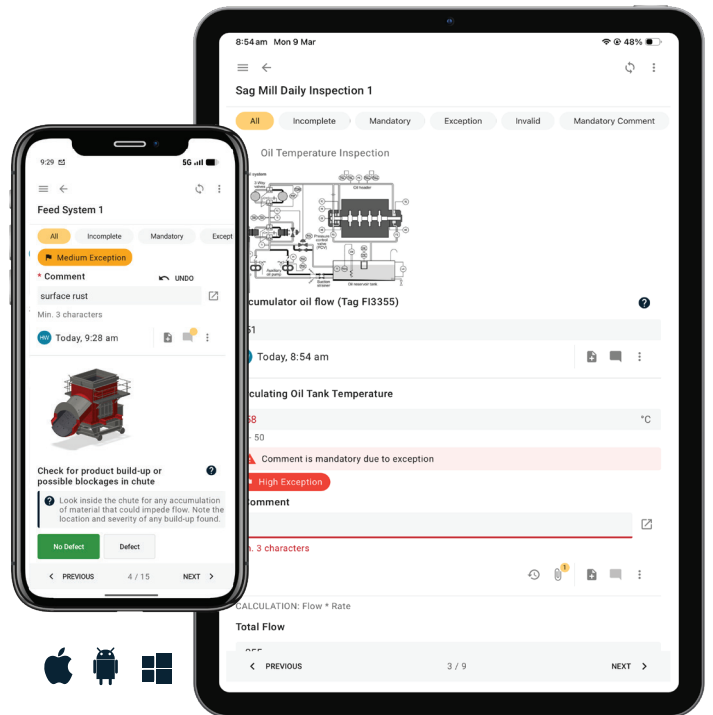

### Connects the field and the office for seamless paperless work execution.

Frontline is the mobile app component of the Obzervr Digital Work Management Solution and the trusted companion for maintenance and field teams across mining and heavy industry.

A highly intuitive mobile app, Frontline has been designed for how mining and heavy industry maintenance teams work, and the challenges they face daily when managing critical assets in harsh environment.

With seamless integration with the back office systems you already rely on, Frontline delivers frontline workers with the right information they need to work smarter, safer and more efficiently. It also provides them with tools to collaborate with their team, planners and supervisors – helping to improve work standardisation and capture of institutional knowledge.

Work offline and online, anywhere on any device.

### FRONTLINE AT A GLANCE...

#### DIGITAL JOB COMPLETION

Eliminates paper with workflows and processes transformed into full digital work execution from assignment to completion.

#### CAPTURE DATA FROM THE FIELD

Capture quality and accurate information, photos and videos at the point of work – eliminating rekey errors and misinterpreted notes.

#### HIGHLY INTUITIVE & EASY TO USE

Frontline has been designed for how field teams actually work, and features a simple and streamlined user experience native to their devices.

#### INCREASES TOOL TIME BY 10%

By eliminating paper process and admin burden, technicians can focus on the higher value and critical work they are skilled in.

#### FAST SYNCING WITH YOUR ERP & CMMS

Seamless integration with back office systems means technicians have up-to-date information, and captured data is quickly synced back to your ERP or CMMS.

#### BUILT ON NEXT-GEN TECHNOLOGY

Built on a modern, next-level technology platform that delivers efficiency today, and the foundations for future advanced capabilities, AI integration and connectivity.

Seamlessly integrates with:

PRONTO
