*How do you know it's time to replace your roof?*

*Look for these key indicators:*

- Shingles are curling, cracking, or losing granules
- Dark spots, soft spots, or sagging areas
- Leaks or water stains inside the home
- A roof that's 20+ years old (we're looking at you 2006 and beyond)
- Ice dams forming in winter
- Higher energy bills from heat escaping
- Neighbors with similar-aged homes are replacing theirs

*We're a local, family-owned contractor who understands Wisconsin weather and knows how to protect your home.*
