SAS810 Tricell

SAS810 Tricell is a decorative open cell ceiling, for airflow and smoke extraction applications. Tricell is an aesthetic development of Trucell, offering the specifier an alternate cell pattern. The ceiling tiles can integrate within other metal ceiling systems and plasterboard ceilings.

Our open cell ceiling systems are ideal for retail, transport or leisure applications with high human traffic flow. Rapid and safe smoke extraction is critical in such environments.

Module Sizes

876mm x 876mm (standard)

Each panel has a nominal cell wall thickness of 15mm to give a precise engineered ceiling appearance.

Bespoke modules and tile sizes are available, subject to the size being divisible by the available cell sizes.

Access

Tiles can simply be lifted and removed from the grid.

Finishes

International White Pre-coat as standard. SAS810 is also available in RAL colours and other bespoke PPC finishes on request.

Service Integration

Tricell allows fire detection and control systems, air conditioning and other services to be located within the ceiling void. Traditional decorative lighting and LEDs can be installed within single or multiple adjacent cells.

Technical Support

Please contact our technical team for all questions relating to access, security, bespoke features, service integration or load support.
