

MOTION ACTIVATED CEILING LIGHT

BL-CSMT-W INSTRUCTION

BL-CSMT-W - Motion Activated Ceiling Light - Requires 3 C batteries (not included)

Thank you for your purchase of this motion activated ceiling light. This light features a 200 lumen neutral white light (4000K) and can be set to turn on anytime motion is sensed, or only when the room is dark (dusk-to-dawn). This light can also be dimmed to 100 lumens in order to conserve battery in dusk-to-dawn mode. This light runs on 3 C batteries that last up to one year, and can be mounted anywhere including closets, basements, laundry rooms, entryways and more.

Mounting Plate Instruction

The Westek motion activated ceiling light comes with a mounting plate that can be easily mounted to a ceiling using the provided hardware. Twist the light clockwise to lift and separate from the attached mounting plate. Use the provided anchors to install your light. Drill 3/16" pilot holes, then gently tap the plastic anchor in the hole until it is flush with the wall. Insert a screw through the mounting plate and into each mounting hole and tighten until the mounting plate does not move. Make sure screw head is flush to mounting plate for a secure fit once fully installed.

Battery Installation

1. If the motion ceiling light is installed, twist light clockwise to separate from mounting plate.
2. Install / replace 3 C batteries with correct polarity as indicated in the battery compartment. Reversed polarity batteries may cause damage to the device.
3. Reposition the motion ceiling light against the built-in mounting plate tabs and twist the light counter-clockwise onto the mounting plate, checking that the ceiling light is locked to the plate.

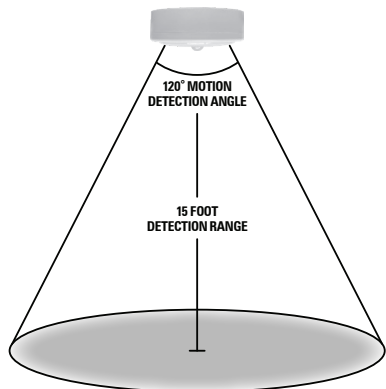

WARNING

- Use only the size and type of batteries specified
- Replace all batteries at the same time. Do not mix old and new batteries.
- Clean the battery contacts and also those of the device prior to battery installation as necessary.
- Do not dispose of batteries in a fire
- Remove batteries if consumed or if product is to be left unused for an extended period of time (>1 month).

Operation

This ceiling light features 120-degree motion detection angle with a 15 foot detection range. It can operate in three different modes:

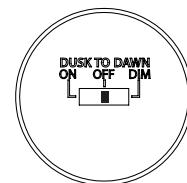

- **200 lumens, dusk-to-dawn only**
- **200 lumens, any light level**
- **100 lumens, dusk-to-dawn only**

A. On Board Operation

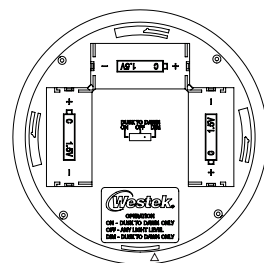

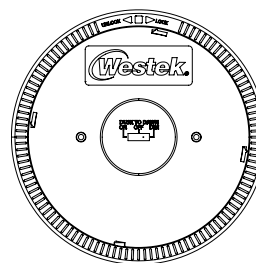

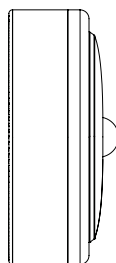

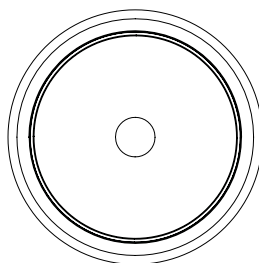

There are **three switch options** to activate motion.

- **ON** activates **200 lumens, dusk-to-dawn only** mode
- **OFF** activates **200 lumens, any light level** mode
- **DIM** activates **100 lumens, dusk-to-dawn only** mode

Light will turn off 20 seconds after last motion detection.

Note: DIM can be utilized to effectively further extend the battery life, achieving up to two years from a single set of C batteries.

Product SKU	Size	Weight	Color Temperature	Max Lumens	Battery Size	Battery Life	Rating
BL-CSMT-W	5.6"L x 5.6"W x 2.5"H	0.47 lb	4000K	200lm (at 100%)	3 C	up to 1 year*	Dry**

*At 200 lumens, 8 activations per day, 20 seconds per activation

**For indoor use only

Warning: Do not disassemble or modify this light. Modification voids the manufacturer's warranty and any applicable regulatory certifications this light may possess.
