

Single Pole

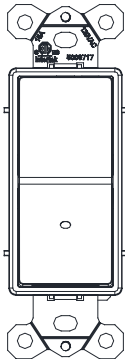

Illuminated Rocker Switch

with Wallplate

WDLS1-2R-W

This single-pole switch automatically illuminates in dark spaces when the load is powered off, ideal for easy locating of the switch at night.

Easy to install, this switch is suitable for both commercial and household installation in standard junction boxes.

Wiring instructions:

- 04 -

- 05 -

TO INSTALL:

1. Strip wire to 11/16" as indicated by the strip gauge on the rear of the housing.
2. To side-wire, loop max 12AWG wire around the screw and torque to 14-18 in-lbs.
3. To back-wire (14AWG solid copper only), push stripped wire into the round wire holes on rear of housing.
4. To remove a back-wired product, insert a small slotted screwdriver into the slot next to the wire hole and gently back out the wire.

- 06 -

5. Mount switch to junction box and restore power.
6. On lighting circuits, the switch will not illuminate if all lightbulbs are removed from their sockets. An electrical load must be present to illuminate.

Limited Warranty

Under normal use and conditions, American Tack & Hardware provides to the original purchaser of this product a one year limited express warranty that is set forth in the Limited Warranty stated in full at www.amertac.com/warranties. The Limited Warranty is in lieu of all other express or implied warranties or liabilities subject to the exceptions explained fully in the Limited Warranty on the website.
