

SECURE & SUSTAINABLE WORKSPACE ANYWHERE

Accops empowers business users to work seamlessly from anywhere without any cybersecurity concerns, all while helping organizations reduce their carbon footprint.

A PARTNER IN YOUR DIGITAL JOURNEY

A single-stop shop to build a simple workspace for all business users, providing seamless access to modern web, SaaS, client-server, legacy and virtual applications, as well as virtual desktops.

WHAT WE DO

End User Computing Virtualization via application & desktop virtualization (VDI). An end-to-end integrated solution, which is hypervisor, infrastructure/cloud agnostic, and can be deployed on cloud or on-premises.

ZTNA Application Access Gateway to enable secure remote access at application layer without network bridging. SPAN technology-based, supports access at Layer 7, Layer 4, and Layer 3. Available for mobile app, desktop client and web-based access.

Identity & Access Management solutions to protect cloud & on-premise applications with adaptive, context-aware MFA and SSO. Easily integrates with all modern and legacy applications. Supports all token type, such as Email & SMS OTP, PC Token App, Mobile App, Hardware Token, Push notifications over mobile and laptop, as well as biometrics.

WE ALSO OFFER

- **Virtual Browser or Internet Isolation solution** for critical infrastructure companies.
- **Virtual ICT Labs solution** for universities & training institutes.
- **Energy-efficient Endpoint Devices** to replace legacy PC-based computing.
- **Secure Container Solution** for BYOD devices to access corporate apps.
- **Fingerprint & Facial Authentication** solution with continuous user environment monitoring capability.
- **MDM Solution** for secure last-mile connectivity over mobile devices.

Accops enables compliant enterprise mobility for business users while keeping governance with the organization.
