Protect your mission-critical iManage Cloud data with HYCU R-Cloud™

Join our early access program and be among the first to secure your data with the official iManage Cloud backup and recovery solution.

Why back up your iManage Cloud data?

Your iManage Cloud data is critical to your business. Without it, you risk severe operational disruption, customer distrust, non-compliance, and even lawsuits. Yet threats like human error, insider actions, third-party failures, and cyberattacks make that data vulnerable.

This makes backing up your iManage Cloud data an essential step for your business.

HYCU R-Cloud™ is the official backup and recovery solution for iManage Cloud, giving customers full control to protect, restore, and export their critical data — all in their own cloud storage.

Keep your iManage Cloud data safe — and in your hands

- ✓ **Get back to business quickly**
Keep work moving, even after cyberattacks, accidental deletions, or service outages.
- ✓ **Cut downtime and avoid costly setbacks**
Avoid revenue loss and hours of file rebuilds with quick, one-click data recovery.
- ✓ **Stay compliant with complete control**
With secure, off-site backups in customer-owned storage, always keep a copy of your data — no matter what.
- ✓ **Simplify backup management**
Manage backups for 80+ workloads across on-prem, hybrid cloud, and SaaS applications beyond iManage Cloud — from a single pane of glass.

Our Strengths

**Google Cloud**

Industry leading data protection for Google Cloud

**Gartner**

Recognized as a Visionary in the Gartner Magic Quadrant for Enterprise Backup and Recovery

**GIGAOM**

Leader in the GigaOM Cloud Native Data Protection Report

Leading in SaaS Backup, File Recovery, DRaaS, Server Backup, and Database Backup

#1 Net Promoter Score (NPS) in Data Protection

Our partnership with HYCU adds another layer of comprehensive data protection to the mix, giving customers the confidence and peace of mind that their data is protected from every angle.

Stay in control of your iManage Cloud data with HYCU R-Cloud™

Secure, off-site backups

Keep control of your iManage Cloud data with off-site backups in a public cloud storage you own.

Instant off-site recovery

Quickly export your backup data to an off-site location if iManage's service becomes unavailable.

Backup autopilot

Automate iManage Cloud data backups with fully customizable 'set and forget' policies that run 24/7.

Granular data recovery

Recover libraries, workspaces, folders, and files along with versions, metadata, and security settings.

Ransomware-proof protection

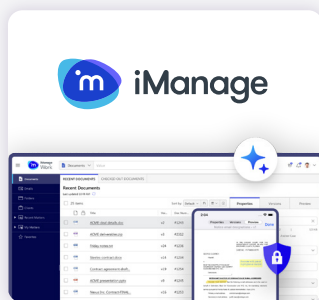

Recover from ransomware attacks with WORM-enabled immutable backup copies that you can rely on.

Compliance-ready backups

Ensure your backups are processed and stored in your desired region to keep your business compliant.

How it works

Flexible policy-driven
automated backups

Data exports offsite

- 1 Connect your iManage Cloud library with HYCU R-Cloud™ within minutes via an API token
- 2 Configure your own storage target that meets your retention and residency requirements
- 3 Set up policies to define the backup frequency and retention period of your choice
- 4 Recover your iManage Cloud library, workspaces, folders, and documents to your own cloud storage

Safeguard your most critical data with HYCU.
