- Updated / refreshed time zone meta data.

New Metadata files:

- The phone and short number metadata of all regions are available now in CSV format, at [resources/metdata](#) directory. This helps in better readability and maintainance compared to RegEx representation for all numbering metadata. The legacy XML metadata files (like `PhoneNumberMetadata.xml`) are now auto generated from this data; so now users can also build tools around CSV representation based on their needs/requirements.
