mission

I am a multi-disciplinary and multi-hyphenated graphic designer, but I prefer to think of myself as a creative problem solver. For the last five years I have worked closely with a variety of clients from small start-ups to firm rooted local businesses, and found that the thing they have in common is not necessarily the need for a "graphic designer," but the need for a creative problem solver. I find great satisfaction in bringing to the table a creative solution to a problem that a client might face. I relish the opportunity to use my knowledge and skill set to bring whomever I work with to a level they may not have originally envisioned for themselves.
