

# Discover the power of trusted health evidence

For over 30 years, the Cochrane Library has been the global gold standard in evidence-based healthcare. With a network of 140,000+ contributors across 130 countries, Cochrane synthesizes complex medical research into actionable insights for healthcare professionals, researchers, and policymakers.

## Why organizations trust Cochrane:

### ◆ Unbiased and independent

No commercial or conflicted funding. Strict editorial and conflict-of-interest policies.

### ◆ Global collaboration

Diverse expertise from researchers, clinicians, and patients worldwide.

### ◆ Regularly updated

Evidence and methods evolve with the latest science and technology.

### ◆ Scientific rigor

Globally recognized leader in systematic reviews—healthcare’s most reliable evidence.

### ◆ Research integrity

Dedicated teams ensure transparency, quality, and continuous improvement.

## By the numbers:

**140,000+**  
contributors in  
**130 countries**

**54,000+**  
translations of plain  
language summaries

**11,000+**  
systematic reviews  
and protocols

**2.2M+**  
records of controlled  
trials in CENTRAL

**15.8M+**  
review reads  
in 2024

**3,500+**  
Clinical Answers

**11.8M+**  
unique visitors in 2024

**Users in 181**  
countries with  
full-text access

**Impact Factor:**  
9.4 (5-year: 10.3)\*

# What's inside the Cochrane Library?

The databases below are all included in your institutional Cochrane Library subscription along with access to Special Collections – curated content collections on trending healthcare topics. With powerful discovery tools including integrated PICO and MeSH, in one search you'll see results from:

## Cochrane Database of Systematic Reviews (CDSR)

The most authoritative source of synthesized health evidence.

- ◆ Plain-language summaries in up to 20 languages
- ◆ Access to underlying data for collaboration and reproducibility
- ◆ Supports care decisions, treatment planning, and resource allocation

## Cochrane Clinical Answers (CCAs)

Evidence at the point of care.

- ◆ Bite-sized, clinician-written summaries
- ◆ Clear answers to clinical questions
- ◆ Interactive tables with key PICO elements
- ◆ 3,500+ CCAs across a wide range of conditions
- ◆ Designed for fast, actionable decision-making

## CENTRAL: Cochrane Central Register of Controlled Trials

A comprehensive database of 2.2M+ records of randomized controlled trials.

- ◆ Sources include PubMed, Embase, ClinicalTrials.gov, WHO ICTRP
- ◆ Multilingual and globally inclusive
- ◆ Ideal for researchers seeking high-quality trial data

## Institutional benefits

**Immediate access to the latest evidence:** A subscription ensures your users can read the most current Cochrane Reviews and updates as soon as they are published.

- ◆ **Cited by 77%** of WHO-accredited guidelines
- ◆ **Supports CME/CPD** and ongoing education
- ◆ **Strengthens research capacity** and mentorship
- ◆ **Dedicated training materials and webinars for users**
- ◆ **Improves evidence-based practice** and clinical competency
- ◆ **Equitable access** to evidence for under-researched conditions
- ◆ **Contextualizes evidence** for local populations and settings

## Unlock the advantages
