

SELF CONTAINED BREATHING APPARATUS (SCBA) TRAINING

Program Overview:

The SCBA training course provides participants with the essential skills and knowledge required to safely operate SCBA equipment in industrial, construction, and emergency response settings.

This course is designed for workers who may be exposed to hazardous atmospheres. This course focuses on real-world applications and practical competency.

The course covers the safe inspection, maintenance, donning/doffing, and operation of self-contained breathing apparatus, ensuring workers can operate in hazardous or oxygen-deficient environments. It covers equipment components, emergency procedures (e.g., low-air scenarios), and, depending on the course, air cylinder handling and cleaning. This training meets or exceeds requirements outlined in CSA Z94.4-18, the OHSA, and applicable industry best practices

Training Content:

- Applicable Legislation, including the OHSA and CSA Z94.4-18
- SCBA limitations and capabilities
- Hazardous Environments
- SCBA components and function
- Pre-use inspection and operational checks
- Donning and doffing techniques
- Emergency procedures and low-air awareness
- Care, cleaning, and storage of SCBA units

Course Delivery Method: This is a 4-hour, instructor led, in-person course that includes both classroom instruction and hands on practical training.
