- Make an airdrop platform for Matry NFT
- Make smart contracts for Matry NFT (ERC721 & ERC1155)

January 2022 –
May 2022

Blockchain Developer, Dystopia Labs

- Make an airdrop claimable smart contract
- Make a web3 event ticketing platform

January 2021 –
March 2022

Web3 Developer, Hashgreed

- Make a website for staking and auctions (<https://hashgreed.com>)

January 2020 –
March 2022

Blockchain Developer, ZeniFinance

- Make smart contracts for DEX, Staking and Vault
- Make a website for ZeniFinance, integrating web3
- Make a soft pegged stable coin - zUSD

May 2021 –
January 2022

Blockchain Developer, SushiSwap

- Make an IDO (auction platform) – MISO (<https://miso.sushi.com>)
- Upgrade SushiSwap interface to v2 (<https://app.sushi.com>)
- Make a subgraph for BentoBox

May 2020 –
December 2021

Full-Stack Developer, NoRV

- Make a C# application for capturing, recording and transcribing
- Make an Android application for controlling C# Application
- Make an application for controlling Programmable Button

June 2019 –
July 2021

Blockchain Developer, AnjiEco

- Make a DEX website (<https://app.anji.eco>)
- Make a staking contract for AnjiEco

January 2021 –
February 2021

Blockchain Developer, CandySwap

- Fork and update PancakeSwap interface for CandySwap
- Fork and update PancakeSwap contracts for CandySwap

Blockchain Developer, Tokenizer

May 2019 –
September 2020

- Create new token TMP forked from ERC-20
- Implement DAO for exchange

EDUCATION

University of Toronto, *Toronto, ON*
Bachelor in Computer Science

KEY SKILLS AND CHARACTERISTICS

- | | |
|---------------------|--------------------|
| · Critical Thinking | · Solidity |
| · Handling Pressure | · DeFi & NFT |
| · Leadership | · ReactJS & NextJS |
| · Problem Solving | · JS & TS |

ACTIVITIES AND INTERESTS

Literature, environmental conservation, art, yoga, skiing, travel
