

# Adrian R

## Personal Summary

---

1. I am a Brand and UX/UI designer with more than 6 years of experience. I love working with the brave, the rule-breakers, and the dreamers, I like to consider myself as a Brand Guardian. I also love music
2. I work with good people who love what they do. I know how to rock corporate gigs, I work with stars and influences, and I work with heart-led people who give 100% to their work. I don't have an ideal client as far as a profile or industry goes. I have ideal feelings - and that is working with people who are excited about the future, who love what they do and who want to create partnerships built on mutual respect.
3. Magic happens when my feelings of excitement for what I do match your excitement for what you do. My art, skills, my purpose is to help create work that transcends you to the next level of business, evoking elevated states of emotion in your audience. Let's make magic together.
