SAFE.**

Hyne's Micronised Copper Azole (MCA) treated landscape products are safe for use where children play and are free of harsh chemicals.

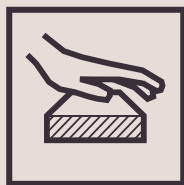

MCA uses fine copper particles and organic compounds to prevent timber from rot and fungal decay, termite and borer attack. Unlike CCA treated timber, Hyne MCA landscape range is free from arsenic and chromium - which can be toxic and unsuitable for applications where children play or food is grown.

The low-VOC, solvent-free formulation ensures a safer option for use in environments where safety matters most—such as gardens, playgrounds, schools and community spaces.

Low-VOC formula

But unlike other 'low odour' treated products, Hyne MCA has low Volatile Organic Compound (VOC) emissions.

Arsenic-free

Treated with an arsenic-free preservative system, that is safe to handle and safe to use in environments where children play.

Decay resistant

Treated to resist fungal decay and rot with a powerful but organic preservative, that will ensure timbers perform for years to come.

Termite resistant

Our industry-leading treatment is forced into the wood fibre and is tough on termites.

FENCING

F

FENCING

Fence posts are suitable for both in-ground or above ground landscaping applications. Fencing products are perfect for use for fencing, gates, decorative screening, or pet enclosures.

SLEEPERS

S

GARDEN SLEEPERS

Suitable for both in-ground or above ground landscaping applications such as low-height garden walls, and won't leach harsh chemicals into the veggie patch.

ROUNDS

R

LOG ROUNDS

Suitable for playgrounds or recreational facility non-structural components, such as sandpits, edging, or log steppers.

APPLICATIONS

Hyne's MCA landscape range is perfect for garden edging, low walls and fencing. The non-toxic formulation ensures it is a safer option for use in environments where safety matters most—such as family gardens, playgrounds, schools and community spaces.

Hyne Landscape products are intended for non-structural, in-ground or above-ground outdoor applications, and are protected against termite and decay.

For install or application advice, please refer to the 'Hyne MCA-Treated Non-Structural Softwood Landscape Product Technical Guide' at hyne.com.au/resources

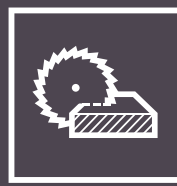

Non structural

Hyne MCA landscape timbers are non-structural and not intended for load bearing applications.

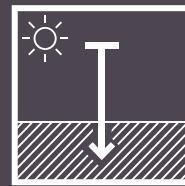

Walls <800mm

Sleepers are intended for low-height garden walls less than 800mm in height.

DIY & trade

Perfect for home projects or trade use for the construction of garden walls, edging or fencing applications.

Above or in-ground

Products are fit-for-purpose and treated for either outdoor above-ground or in-ground applications.

| | TREATED FOR | END SECTIONS (mm) | LENGTHS (m) | | | | |
|---------------------------|---------------------------|---------------------|-------------|-----|-----|-----|-----|
| Sleepers | In ground or above ground | 200 x 50, 200 x 75 | 1.2 | 1.8 | 2.4 | 3.0 | 3.6 |
| Fence Rails | Above ground | 75 x 38, 100 x 38 | 4.8 | | | | |
| Fence Posts | In ground or above ground | 100 x 75, 100 x 100 | 2.4 | 3.0 | | | |
| Fence Pailings | Above ground | 75 x 15, 100 x 15 | 1.2 | 1.8 | 2.1 | 2.4 | |
| Garden Edge | In ground or above ground | 100 x 15, 150 x 25 | 4.8 | | | | |
| Pine Logs – Perfect Round | In ground or above ground | 80, 100, 125, 150 | 1.8 | 2.4 | 3.0 | 3.6 | |
| Pine Logs – Splits | In ground or above ground | 80, 100 | 1.8 | 2.4 | 3.0 | | |
