CVTC Sustainability

At CVTC, we are committed to supporting the environment and promoting sustainable practices across our training centres. Through thoughtful initiatives and ongoing improvements, we are actively working to reduce our environmental footprint. Please see below how we are making a difference.

Car Sharing & Public Transport: We have several learners who carshare and use public transport to attend the centre.

Online Delivery: We deliver online courses for Level 2, 4 and 5.

Reducing Paper Usage: We provide all learning materials on our virtual learning environment.

Home Working: Colleagues work from home when suitable.

Reusing: Consumables for teaching practicals are reused and no clinical waste is produced.

Recycling: We recycle printer cartridges, paper, plastic, metal and glass.

Biodiversity: Learners and colleagues are planting Wildflower seeds for the bees and insects.

Wellbeing: We have plants in our wellbeing areas.
