

speQsens (Pseries)

Sputtered Electrodes (Au) on Plastic Substrate

speQsens P3

SpeQsens P3 Sputtered Electrodes are composed with three connection tracks, all made of a pure gold on a plastic substrate.

Plastic substrate dimensions: **L 22,8 × W 7,6 × H 0,24 mm**

Plastic substrate specifications: Thermostabilized polyester thickness **250 µm** / Thermal Shrinkage **200°C**

Electric contacts: **Gold**

The Electrodes cell consists on:

- Working electrode: **Gold** (4 mm diameter)
- Auxiliary electrode: **Gold**
- Reference electrode: **Gold**

They should be stored at room temperature, protected from light in a dry place.

For cleaning just pour some ethanol solution on the electrodes and dry under a gently stream of N₂.
