## Western Sales Expands with New Truck & Tire Venture

The landscape of local business rarely shifts without leaving a lasting impression, and this season, Western Sales is making one of its most significant moves yet. In a bold step that blends innovation with community commitment, the company has announced the launch of a new business operating from its former Rosetown location — a decision that signifies not only growth, but an evolving vision for service in West Central Saskatchewan.

For decades, Western Sales has earned a strong reputation built on reliability, customer trust, and deep agricultural roots. Now, through strategic partnerships with OK Tire, Traction, and TruckPro, the company is expanding its reach to better support an even wider range of customer needs. This collaboration positions Western Sales Truck and Tire to deliver a comprehensive suite of services — including heavy-duty truck maintenance, specialized repairs, agricultural tire solutions, and parts distribution — all under one roof.

At the centre of this expansion is Tyler Wynnyk, a respected figure in the regional truck repair industry. He brings with him an experienced team known for technical skill and a long-standing commitment to customer satisfaction.

“This expansion allows us to better serve our customers while continuing to build on the trust Western Sales has earned over the years,” says Carl Persson, President of Western Sales. “With Tyler Wynnyk and his team joining us, we are confident this partnership will bring tremendous benefits to our customers and the community.”

As transportation demands grow and the agricultural sector evolves with larger and more complex machinery, the need for advanced heavy duty support has increased dramatically. This new business addresses that reality head on.

Customers will find an operation built for efficiency and modern capability. The service team uses advanced digital diagnostic systems to quickly identify electrical issues, engine problems, and error codes, ensuring repairs are completed with accuracy and reliability. It is also an SGI-Accredited Inspection location, offering complete vehicle inspections for body integrity and mechanical safety on trucks, trailers, and power units.

Convenience is central to the new location. For truck drivers, farmers, contractors, and travellers, having tires, parts, and repair expertise in one place means fewer delays and less time spent searching for support. This expansion reflects Western Sales’ dedication to the community it serves. More than a business move, it is an investment in Rosetown and the surrounding region, reinforcing the value of strong, local support systems.

Led by Tyler Wynnyk and his experienced team, the operation blends hands-on expertise with Western Sales’ long-standing values. As the former location reopens with a broader purpose, Western Sales reaffirms its commitment to evolving with its customers and supporting the industries that keep Saskatchewan moving. For information or to book a service, call (306) 518-7840.

**BEAT THE CLOCK.**

High-performance Brandt 10", 13", and 16" swing away augers keep your grain flowing with the #1 speed and efficiency in the industry, helping you beat the clock during harvest.

**More Efficient**

Brandt EZReach extendable swing hoppers for 13HP+ and 16HP augers feature a 25% larger hopper to speed up your operation.

**Easier to Use**

The EZSWING hopper mover is available with electric controls to guarantee easy maneuvering with a remote control or LeadHand app.

**Longer Lasting**

Brandt's extended-life auger flighting, premium powder-coat paint finish, and easy maintenance access points all keep your auger lasting longer.

## MY27 Features:

Scan here for more information on Väderstad seeding products:

### Hydraulic Braking Option

Previously available for PD 1350 models only. The hydraulic braking system is now optional on PD 820 & 1000 bushel air carts. Allowing farmers greater confidence and safety in the field.

### BTT Factory Option

BTT seed & fertilizer knives may now be selected as a from-factory option for Seed Hawk toolbars, offering exceptional seed and fertilizer placement with outstanding durability.

### Clone Jobs

Save time by quickly replicating an existing job using the new *Clone Job* feature. Cloning a job copies product profiles and tank locations from a current or completed job into a new one.

# APPLICATION TECH

## **SEE & SPRAY SELECT™ VARIABLE RATE**

*Apply product at variable rates in real time  
at nozzle level resolution\**

## **AUTOTRAC™ TURN AUTOMATION**

*Pinpoint-precise turns*

## **SEE & SPRAY SELECT PRECISION UPGRADE KIT (MY18+)**

*77% average herbicide savings using advanced camera  
and nozzle-control technology to spray only weeds\*\**

## **EXACTAPPLY™ WITH MULTI-RATE**

*Reduce over-application, crop burn, and  
off-target drift*

\*Annual license required.

\*\*Based on tank-level sensor values taken at a steady state on John Deere sprayers equipped with and without See & Spray™ Select, before and after covering 75,000 acres of fallow ground with a typical weed pressure of 3,000 weeds per acre, using small and medium spray-length settings starting at 2.3 to 3.2 ft. (0.7 to 1 m) and average growing conditions (seasonal precipitation and temperature) across the US and Canadian plains and Australian farms. Spray-length settings varied based on ground speed, spray pressure, and boom height. Sprayers were equipped with current hardware and software at time of study. Individual results may vary based on field and growing conditions, weed pressure, spray-length settings, and software version.

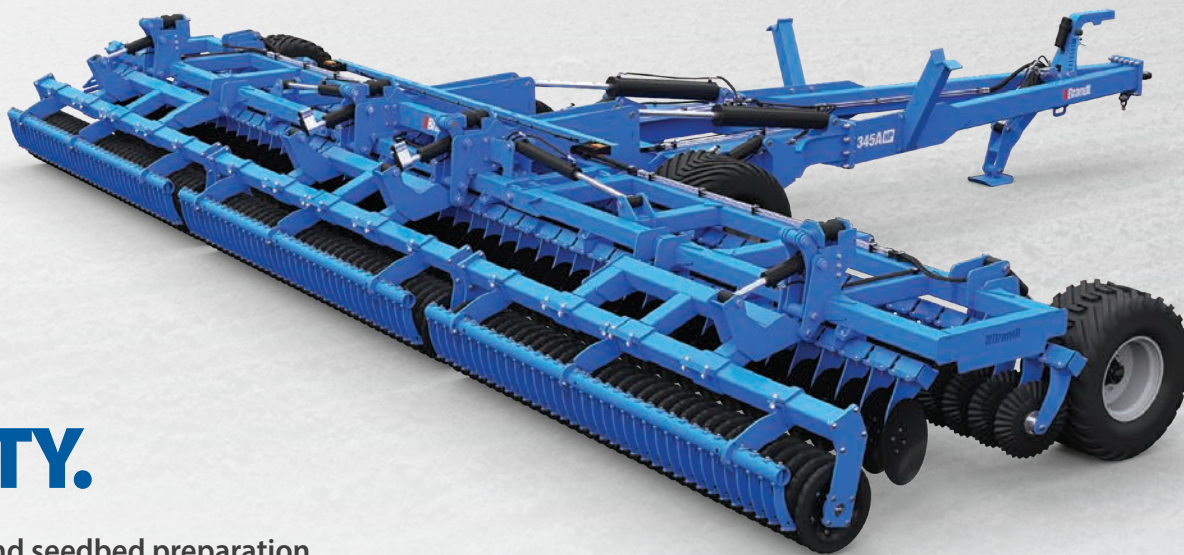

SCAN TO LEARN MORE

**LEAD THE FIELD.**

# PROVEN PRODUCTIVITY.

Get the best residue management and seedbed preparation in fewer passes with the new Brandt High-Speed Disc.

## More Speed

Spend less time in the field with operating speeds of 10 to 14 mph, and our easy-to-use wing down-pressure system.

## More Uptime

Purpose-built components with a robotically welded frame and greaseless bearings ensure near-zero maintenance for more uptime and durability.

## More Options

Choose from seven unit sizes and a variety of discs and rollers that are perfectly suited to your field, conditions, and desired finish.

## GO BIG... THEN GO HOME

More capacity means less tending—and less tending means you can finish faster. The new C1100T Air Cart gives you 1,100 bushels of total capacity, including a 105-bushel Flex Tank for added versatility. The EZLift System handles up to 2,400 lbs (1,089 Kilograms) and includes a bulk-bag platform for quick, easy refills in the field. Plus, John Deere Operations Center™ connectivity lets you send work plans, monitor performance, and review seeding results—all from your phone or office.

# C1100T

C-SERIES AIR CART

Contact your Western Sales Ag Solutions Professional to learn more.

### By the Numbers

Load up to  
**1,100**  
bushels of product.

EZCal™ calibrates up to  
**75%**  
faster than traditional calibration<sup>1</sup>.

Handles loads up to  
**2,400 lbs**  
with new EZLift System

### EZLift System

With a lifting capacity of 2,400 pounds (1,089 kilograms), the EZLift System makes in-field unloading of bulk bags fast and convenient. That eliminates the need for additional tractors, picker trucks, or telehandlers in the field, reducing field logistics. Plus, an optional Bulk Bag Platform gives you easy in-field access to an extra bulk bag or seed pallet, ensuring uninterrupted tending.

### High-Capacity Conveyor

We made the C1100T conveyor longer, giving it a lower angle of repose for higher fill rates. And a stainless steel hopper makes it more corrosion resistant.

### New 105-bu Flex Tank

A new 105-bushel Flex Tank gives you room for 55 more bushels than previous models. Upper and lower fill locations – and an extra platform – also make it easy to empty bags.

### AccuRate™ Meters

- Adjust product speed and volume at the primary level for up to 8x greater precision.<sup>1</sup>
- Adjust meter rates to match tool speed on the inside and outside of a turn, ensuring consistent application rates.
- Shut off each meter individually instead of using gates, preventing potential seed damage and seed dumping.

### EZCal™ System

- Calibrate up to 75% faster than traditional methods and reduce the learning curve for new operators.
- Eliminate the need for calibration bags and save more than 100 walking steps.
- Maximize productivity by knowing how much product remains in the tank and when to refill right from the cab with ActiveCal™.

### Integrated Precision Tech

- Seamlessly connect to John Deere Operations Center™ to find more automation tools like AutoPath™, AutoTrac™ Turn Automation, AutoTrac™ Implement Guidance, and more.
- Wirelessly send Work Plans to your operators as they begin field work.
- Use Operations Center to manage logistics throughout your entire organization.

<sup>1</sup>Based on internal testing of a current production bag calibration on a 1910 air cart taking 10 minutes to calibrate compared to a EZCal-equipped air cart taking 2 minutes and 15 seconds.

## BELT IT OUT.

Brandt field grain belts deliver rapid, gentle transfer of any crop. They are available in 15" or 20" gas or electric models, with an optional gas mover kit.

### More Efficient

Optimized intake and transition increases grain-flow efficiency, achieving peak performance.

### Greater Versatility

The retractable hopper and intake delivers better clearance for low bin unloads with a range of 7.5" to 16".

### Easier to Operate

Brandt's EZTRAK tensioning and tracking system keeps your belt aligned and properly tensioned.

# OPTIONS TO FIT YOUR FARM

TALK TO THE EXPERTS AT **WESTERN SALES**  
Powered by AWDG

#### SINGLE SHOOT SEED OPENER

This opener is designed around a smooth one piece casting. The design produces an opener having minimal drag with less soil throw. The opener is equipped with two nose carbides & added hardsurfacing to ensure a very long wear life.

**FERTILIZER TYPE:** Starter Fertilizer w/ Seed Only  
**TUBE SIZE:** 1-1/4" (32mm) O.D.

**680-KNF-5100**

**FITS:** BOURGAULT PLX, PLS, XTC, QDA

#### SINGLE SHOOT SEED OPENER

The narrow design allows for more accurate seed placement behind the tip. The tip width is 5/8". Extra hard surfacing on critical wear areas increases the life of the holder.

**FERTILIZER TYPE:** Starter Fertilizer w/ Seed Only  
**TUBE SIZE:** 1-1/4" (32mm) O.D.

**689-KNF-1000**

**FITS:** JOHN DEERE P670 & P680 PRECISION AIR-HOE DRILL

#### 1/2" FERTILIZER KNIFE

This is a non replaceable 1/2" tip fertilizer knife with extra hard surfacing along the critical wear areas and two piece of front carbide for maximum wear protection.

**FERTILIZER TYPE:** Granular  
**TUBE SIZE:** 1-1/4" (32mm) O.D.

**689-KNF-2000**

**FITS:** JOHN DEERE P670 & P680 PRECISION AIR-HOE DRILL

## BTT DEMO PROGRAM

Through the BTT Demo Program, we offer you the opportunity to try a few of our parts & compare how they perform against products you're currently using.

**No pressure. No obligation to buy.**
