

Birubi Point SLSC Education.

This is a reminder that we are running the First aid course on Monday and Tuesday 6-9pm both nights next week 26 and 27 October. The cost for FIRST AID is \$40 to be paid via the club's EFTPOS facilities on the Monday night. (There is no cost for the SRC trainees who are just doing the Resus component on Monday only)

Please all:

- **ENROL in and COMPLETE the relevant modules for your course from the members Hub BEFORE you come.** These are FIRST AID and Lifesaving CPR if you are doing the First aid course (**SLS Resuscitation Theory AND Lifesaving CPR for the SRCs**).
- The online components for both First Aid and Resuscitation are found on the members hub; eLearning; Training Library; SLS Emergency Care Tab; click on the ENROL button which will ALLOCATE the modules into your "My Training" area. (SEE THE SCREEN SHOT BELOW). The My Training area then becomes the place where you will find them. So you can do a little bit at a time or the whole lot. When you have finished a unit click on EXIT to save your progress. When all done, EXIT and then go back in to check that your module is COMPLETED and your CERTIFICATION is showing at the bottom. This means you have finished - click on the certification to see/save/print your certificate of completion for the Online component.
- **ATTENTION: The ONLINE modules need to be done BEFORE the practical components at the club. If you need assistance finding or completing the modules contact your trainer(s) or me OR Sue Hume who will assist you. IF YOU HAVE NOT COMPLETED THE ONLINE COMPONENT YOU WILL NOT BE ABLE TO COMPLETE THE PRACTICAL NEXT WEEK.**
- Arrive by 5:50pm so that registration and payments can be processed before we begin.
- Bring your evidence that you have completed the MANDATORY online components for the course First Aid course (OR for SRC members the resuscitation theory component) E.g. your Certificate of completion. A screen shot will do.
- PLEASE ALSO ENROL in, and complete the **Lifesaving CPR module** (ALSO in the training Library, SLS Emergency Care area)
- Wear comfortable clothing that is suitable for performing simulated resuscitation, using manikins on the floor.
- Bring a pen so that you can complete the relevant paperwork.
- Print the steps above if you need to refer back at any time.
