1. The Paytient card works with providers in approved merchant categories, including select online merchants. The provider self-selects their merchant category, and in some cases, might not be categorized as expected. Approved merchant categories vary by Sponsor. Transactions made with unapproved online merchants will be subject to decline. Log in to <http://my.paytient.com> or the Paytient app to see which categories are approved for your card. Please note: The Paytient card cannot be used to pay health insurance premiums.
2. Paytient is required to confirm that you are able to afford your Paytient monthly minimum payments, and they do this by comparing your income to your expenses during your application. This is not a credit check and will not affect your credit.
